Meanwhile, Commander-in-Chief of the Libyan Armed Forces, Lieutenant General Saddam Khalifa Haftar, called on Chief of the Naval Staff, Admiral Naveed Ashraf, at Naval Headquarters, Islamabad.

Upon arrival at Naval Headquarters, Commander-in-Chief of Libyan Armed Forces was received by Chief of the Naval Staff. During the meeting, both leaders discussed matters of mutual interest, regional maritime security situation, and avenues for enhanced cooperation in training and defence. Admiral Naveed Ashraf highlighted Pakistan Navy's initiatives for ensuring maritime security and peace in the region through Regional Maritime Security Patrols.

Lieutenant General Saddam Khalifa Haftar appreciated and acknowledged Pakistan Navy's contributions and unwavering commitment to collaborative maritime security efforts in the region. Both leaders pledged to further strengthen and diversify the scope of existing bilateral defence relationship. Pakistan and Libya share longstanding brotherly relations marked by close naval cooperation. The visit of Commander-in-Chief of Libyan

### Success of Shahida, Gurpal on KP reserve seats notified F.P. Report

ISLAMABAD: The Election Commission of Pakistan (ECP) on Friday officially notified the success of Shahida Waheed and Gurpal Singh on two seats reserved for women and non-Muslims in the Khyber Pakhtunkhwa Assembly.

According to an official notification, Waheed of the Awami National Party (ANP) has been declared successful on the seat reserved for women, while Jamiat Ulema I Islam-Fazl's (JUI-F's) Gurpal Singh has secured the seat reserved for non-Muslims in the Khyber Pakhtunkhwa Assembly.

It should be noted that Senate elections for seven general seats, two seats reserved for women and two seats reserved for technocrats and religious scholars ('ulema') from the Khyber Pakhtunkhwa Assembly are scheduled to

be held on July 21.

Meanwhile, The ECP appointed eight polling officers to oversee the Senate elections set to take place in Khyber Pakhtunkhwa on

Senate elections for 11 seats from the Khyber Pakhtunkhwa Assembly will be held on July 21, according to the Election Commission of Pakistan (ECP). The seats include seven general seats, two reserved for women, and two designated for technocrats and religious scholars ('ulema'). The polling will be conducted under the supervision of appointed officers to ensure transparency and adherence to electoral procedures.

According to the official notification, those appointed include: Syed Nadeem Haider, Additional Director General (Elections). Nazar Abbas, Additional Director General (MCO); Saeed Ahmed Khan, Regional Election Commissioner, Dera Ismail Khan Division; Zulfiqar Ahmed, Regional Election Commissioner, Hazara Division; Zaheer Ahmed, Deputy Director (Admin), Provincial Election Commissioner KP; Fahad Ali Shah, Deputy Director (Admin), PEC KP; Muhammad Amjad, Deputy Director (Law) and Zia-ur-Rehman, District Election Commissioner, Peshawar.

# KGMC promotions declared illegal by MTI Tribunal

F.P. Report

PESHAWAR: Khyber Pakhtunkhwa Medical Teaching Institutions (MTI) Appellate Tribunal has rejected the promotion appeal of Dr. Yasir Rehman Khattak and declared all the recent out-of-turn promotions at Khyber Girls Medical College (KGMC) as illegal, ordering that all such employees be reverted to their original posts.

Dr. Khattak, currently serving in (BPS-18) in the discipline of Oral and Maxillofacial Surgery, had applied for promotion to (BPS-19) under the Accelerated Promotion Criteria introduced in the Amended Appendix-8 of the MTI Regulations 2022.

However, the Institutional Promotion Committee (IPC) declared him ineligible, citing insufficient experience in accordance with the Pakistan Medical and Dental Council (PM&DC) regulations.

In its ruling, the MTI Appellate Tribunal upheld the IPC's decision and dismissed Dr. Khattak's appeal, stating that he failed to meet the mandatory experience requirements outlined by the PM&DC. The tribunal maintained that adherence to prescribed eligibility criteria is essential and cannot be overridden by internal regulations or performance-based claims.

Significantly, the tribunal raised serious concerns over the legality and fairness of the Accelerated Promotion Criteria (IPC) itself. The judgment stated that out-of-turn promotions violate fundamental service rules and disrupt the official seniority structure, leading to injustice against and to hold those responsible accountable.

deserving officers who are bypassed.

The competent authority may recognize outstanding performance through certificates or awards, but these cannot be used as the basis for promotion unless eligibility requirements are fully satisfied, the judgment noted. The tribunal further remarked that accelerated promotions undermine the integrity of public institutions and infringe upon the rights of other public servants waiting for promotion based on merit and seniority.

It is pertinent to mention that around 150 employees at KGMC have allegedly been promoted in recent years under the controversial Accelerated Promotion mechanism. Reports suggest that many of these appointments were made in violation of merit, drawing criticism from within the institution as several eligible candidates remain deprived of their rightful career progression.

Despite repeated appeals and objections raised by affected employees, no remedial action had been taken until the tribunal's recent intervention. The ruling is expected to prompt further scrutiny of promotional practices within KGMC and other MTIrun institutions across the province.

There is a growing demand for a highlevel official inquiry into the promotion practices at KGMC and other MTI institutions in Khyber Pakhtunkhwa. Stakeholders, including overlooked senior staff, have called on the provincial government and health department to investigate how such widespread misuse of authority was allowed

### IGP takes notice of four killing

Home

LAHORE (APP): Inspector General of Police (IGP) Punjab Dr. Usman Anwar has taken notice of a tragic firing incident in the Bhoun Road area of Kahuta, Rawalpindi, which resulted in the deaths of four individuals.

According to the spokesperson for Punjab Police, the IGP has sought a detailed report from the regional police officer Rawalpindi, and instructed the city police officer to ensure the immediate arrest of those involved. Dr. Usman Anwar emphasised that all available resources must be utilised to apprehend the suspects at the earliest.

Rawalpindi revealed that preliminary investigations suggest the incident stemmed from an old enmity. Special police teams have been constituted to track down and arrest the perpetrators. The deceased have been identified as Junaid Gul, Mateen Kayani, Shoaib and Samar Iqbal.

### Four held in honey trap case

LAHORE (APP): Hanjarwal Police have arrested four suspects, including two women, allegedly involved in a honey

trap scheme on Friday.

According to police spokesperson, the suspects were apprehended during a targeted operation conduct-ed by Hanjarwal Police using modern technology. The accused were identified as Nadeem, Umair, Rubina and Ayesha.

The spokesperson said that Rubina contacted a citizen named Waqar through mobile phone and lured him to her location under false pretenses. Upon arrival, the victim was illegally detained, subjected to physical torture and recorded in inappropriate videos.

It was further revealed that the main accused, Nadeem, an employee of Civil Defence, impersonated a police officer to intimidate the victim. The suspects reportedly black-mailed Waqar and extorted money from him by threatening to release the videos.

A case has been registered against the accused and further investigation is underway. The matter has been handed over to the investigation wing for detailed inquiry

Superintendent of Police Muhammad Umar appreciated SHO Adeel Anjum, Sub-Inspector Idrees and the police team for their performance and announced commendation certificates for their efforts. "Those who exploit inno-cent citizens will face strict legal action," said Umar.

### **PPSC** announces results

LAHORE (APP): Punjab Public Service Commission on announced the results for 16 posts including the Police Communications and departments.

According to the Secretary Punjab Public Service Commission Afzal Ahmed, 5 candidates have successfully qualified for one post of Deputy Manager Basin Studies in the Minerals Department, while 34 candidates have successfully qualified for 42 posts of Tehsildar Ministerial Quota in the Revenue Department.

Likewise, four candidates have successfully qualified for 9 posts of Naib Tehsildar in Ministerial Quota in the Revenue Department Lahore, and 2 candidates have successfully qualified for 7 posts of Naib Tehsildar Ministerial Quota in the Revenue Department Bahawalpur. Only one candidate qualified among 7 posts of Naib Tehsildar Ministerial Quota in the Revenue Department DG Khan, 4 candidates have successfully qualified for 7 posts of Naib Tehsildar Ministerial Quota in the Revenue Department Faisalabad, and 4 candidates have successfully qualified for 8 posts of Ñaib Tehsildar Ministerial Quota in the Revenue Department Gujranwala.

Similarly, 2 candidates have successfully qualified for 2 posts of Revenue in Multan, 2 candidates have successfully qualified for 2 posts of Revenue in Rawalpindi, while 8 candidates have successfully qualified for Revenue Department in Sargodha.

# Sindh govt vows comprehensive support for newspaper industry

KARACHI: The Sindh government has resolved to take all-round measures for the development of the newspaper industry in the province. In this context, a consistent and long-term policy will be made through consultation with media owners, editors, journalistic bodies, and other stakeholders concerned to overcome the problems being faced by the newspaper industry and to develop it.

A high-level delegation of the Council of Pakistan Newspaper Editors (CPNE) met with Sindh Senior Minister Sharjeel Inam Memon in Karachi. The delegation included CPNE Sindh President Qazi Asad Abid, Secretary General Ghulam Nabi Chandio, and former Secretary General

Nadeem-ur-Rehman Memon and Director of Advertisement Muhammad Yousuf Kaboro were also present at the meeting.

The session discussed all significant issues, including the issues faced by the newspaper industry, granting of grants to CPNE, and the alloting of a plot in a handy area of Karachi to the office of the organization. The CPNE delegation asked the Sindh government for help in these respects.

Speaking on the occa-Senior Minister Sharjeel Inam Memon said that the newspaper industry serves as the eyes and ears of society and plays a vital role in ensuring the continuity of democracy, trans-He stated that providing

employment, protection, insurance, and professional training is a top priority for the Sindh government.

He also added that there are serious steps being taken to save the wages of journalists and their job security.

Sharjeel Inam Memon further added that the Sindh government stands with the journalism fraternity and will make sure that media organizations are independent and resilient. He emphasized that organizations like CPNE play a vital role in promoting press freedom, and their issues will be addressed on a priority basis. He reiterated the commitment that the Sindh government's forthcoming policy will not only strengthen newspaper instiparency, and accountability. tutions but also ensure the welfare of journalists.

# PHC Abbottabad bench transfer Kohistan scandal case to Principal bench

PESHAWAR: A two-member bench of the Peshawar High Court (PHC) comprising Justice Mudassir Amir and Justice Aurangzeb, has directed the transfer of cases related to the Kohistan scandal to the Principal Seat of the Peshawar High Court. The court observed that it had previously directed that all cases related to the National Accountability Bureau (NAB) would be heard at the Principal Seat in Peshawar. The petitioners had filed a writ petition against the freezing of their company's accounts by NAB in connection with the Kohistan scandal. The petitioners' counsel argued that NAB's action was unjustified, while the Additional Prosecutor General of NAB, Muhammad Ali, informed the court that the cases were currently pending before the Abbottabad bench and needed to be transferred to the Principal Seat. PHC noted that in 2015, it had issued a notification directing that all NAB cases would be heard at the Principal Seat in Peshawar. Therefore, the court directed that the writ petitions be transferred to the Principal Seat, and no further proceedings would be held at the Abbottabad bench.

#### Massive poppy crop destroyed F.P. Report

CHAMAN: Authorities eradicated a substantial illegal poppy cultivation spanning over 100 acres in Chaman, a bordering region

Afghanistan, spokesperson for the Anti Narcotics Force (ANF) announced. The operation, a joint effort between

Balochistan Excise and Taxation Department and the ANF, targeted fields where the illicit crop was being grown. The spokesperson stated the action demonstrates the Balochistan government"s resolve to combat drug production. The eradication effort represents a significant blow to the illegal narcotics trade in the area. This joint operation highlights the ongoing cooperation between provincial and federal agencies to curb the cultivation and trafficking of drugs. The statement emphasized that this campaign underscores the commitment to eliminate narcotics within the

#### FJA team visits Haripur Jail F.P. Report

HARIPUR: A delegation from the Federal Academy (FJA), Islamabad paid a detailed visit to the Central Jail Haripur, the other day said that a press release issued here on Friday. The delegation was led by Director Deputy Federal Judicial Academy, Islamabad, Syed Director Assistant Bushra while Senior Civil Judge Haripur, Tariq Shiraz accompanied them. Superintendent Haripur, Acting DIG Hazara Region, Hamid Azam gave a comprehensive briefing about the jail to them. The delegation visited sections of the prison, included the Drug Rehabilitation Centre, ideo Link. Women's Ward and Jail Factory. The members of the delegation expressed their heartfelt gratitude to the jail authorities and appreciated the facilities provided to the prisoners at the jail.

#### JI flays govt economic policies F.P. Report

ATTOCK: The current government's poor economic policies have made life miserable for the people. The prices of electricity, sugar, and petroleum products are skyrocketing, while the incompetent rulers have completely failed to provide any relief to the public. The speakers alleged that sugar is being imported and then reexported at higher prices, which is a prime example of the worst kind of economic mismanagement. views expressed by Ameer Jamaat-e-Islami Attock District, Sardar Amjad Khan, General Secretary Muhammad Bilal, and Ameer Tehsil Hafiz Mian Muhammad They were addressing a protest rally organized by Jamaat-e-Islami Attock on the appeal of Ameer Jamaat-e-Islami Pakistan, Hafiz Naeem ur Rehman, against the government's economic policies. The rally started from Jamia Masjid Dar-ul-Islam Colony and concluded at Peoples Colony Chowk. It was led by Sardar Amjad Ali Khan, Hafiz Muhammad and Hafiz Muhammad Bilal. A large number of party workers participated in the rally, holding placand inscribed with slogans against inflation, unemployment, and the government's policies. While addressing the rally, the speakers reiterated that the current gov ernment's flawed economic decisions have made people's lives unbearable.

# JI protests soaring prices of fuel, sugar, and electricity

**Haleem Asad** 

LOWER DIR: On the call of Jamaat-e-Islami's central chief Hafiz Naeem ur Rehman, a protest demonstration was held in Timergara on Friday, the district headquarters of Lower Dir, against the sharp rise in prices of petroleum products, sugar, and electricity as part of a countrywide campaign by the party.

The protestors marched on foot for two kilometers from Ahya-ul-Uloom, Balambat to Gorgorai Chowk, chanting anti-government slogans throughout the rally. Holding placards and banners inscribed with slogans against price hikes, they condemned the government for what they called "unbearable inflation."

The demonstration was also addressed by JI Khyber Pakhtunkhwa spokesperson Hafiz Yaqoob ur Rehman, district general secretary Shoaib Ahmad, and other local leaders. Addressing the protest, former MNA and Jamaat-e-Islami's Lower Dir district chief Maulana Asadullah Khan said that while oil prices were steadily declining in the international market, the government was continuously burdening the public with price hikes. He noted that the recent increase of Rs12 per litre in diesel and Rs6 per litre in petrol was intolerable for the common man.

He demanded that the government immediately rein in the sugar mafia and bring electricity tariffs under control. The speakers alleged that the sugar cartel was looting the public with the backing of those in power. They urged the government to reverse the recent price hikes and provide relief to people crushed under the weight of inflation.

Pay gap with federal employees causes resentment among KP government workers: A wave of disappointment has spread among Khyber Pakhtunkhwa government employees over the significant pay gap between provincial and federal employees, with federal workers reportedly receiving up to Rs30,000 more in monthly salary.

Rahmatuddin, Vice President of Malgari Ustazan, Malakand Division, traders' associations. highlighted the issue and urged the provincial government to address the disparity without delay. He emphasized the need to eliminate the gap in basic salaries between federal and provincial staff.

Talking to local journalists in Munda, he explained that the federal government granted employees a 30% Disparity Reduction Allowance (DRA) along with a 10% increase in basic pay based on the 2022 pay scale. In contrast, the KP government provided only a 10% increase based on the outdated 2017 pay scale.

As a result, provincial employees working in various departments are receiving strict action would be taken against anysignificantly lower salaries than their federal counterparts, leading to a growing Commissioner Zeeshan Najeeb said the sense of deprivation among them.

have strongly condemned the govern-ment's sudden decision to raise prices in the dead of night, calling it a cruel and unacceptable act of economic aggression.

Speaking to the media on Friday, local residents said that while global oil prices are continuously falling, the Pakistani government has been increasing fuel prices every 15 days, making life increasingly difficult for the poor. They said the recent hike of Rs6 in petrol and Rs12 in diesel is absolutely unacceptable. According to the citizens, this increase will trigger a new wave of inflation, affecting everything from transportation to daily essentials, which are already unaffordable for many. They demanded that the current fortnightly price adjustment mechanism be abolished and replaced with a quarterly system to provide some relief to the pub-

Meanwhile, Jamaat-e-Islami Lower Dir General Secretary Shoaib Ahmad strongly condemned the hike in petroleum prices terming it "economic terrorism." He said the ruling elite, under pressure from international financial institutions, has made life unbearable for the common man. He added that it has now become impossible for the poor to meet even their basic needs

He demanded an immediate reversal of the recent hike and called for a transparent, permanent, and people-friendly policy for determining fuel prices. Public circles have urged the government to act wisely, warning that growing economic pressure and inflation have pushed the people's patience to the brink.

Meeting on traffic issues: To address growing traffic issues and the slow pace of on the under-construction Munda-Samarbagh road, a stakeholders meeting was chaired by Assistant Commissioner Zeeshan Najeeb at his office here the other day. The meeting was attended by Tehsil Chairman Saeed Ahmad Bacha, former nazim Qazi Hussain Ahmad, officials of the KF Highway Authority, local contractors, traffic personnel, and representatives from

Participants expressed concern over the increasing congestion of traffic in bazaars and delays in road construction. To ease traffic, it was decided to ban the entry of heavy vehicles into markets from 6am to 4pm. Similarly, the transportation of granite from Mines sites to stock points will not be allowed between 12 noon and 2pm, while granite delivery from stock points will only be permitted from 7pm to 7am.

The road contractor was also directed to stay in contact with traffic and Levies officials to avoid any inconvenience to the public. The administration warned that one violating these orders. Assistant measures aim to improve traffic flow and People reject hike in Petroleum ensure timely completion of the road proj**prices:** The recent increase in petroleum ect, urging the public to cooperate with the

### Monsoon plantation drive launched F.P. Report

BUNER: Deputy Com- SIALKOT: As many as five missioner Buner kicked of monsoon tree plantation drive by planting a sapling in the Dr. Qadeer Khan

Colony, Daggar. He distributed various types of fruit plants among the government staff present on the spot and the youth and children of the area.He gave the message that according to the vision of Chief Minister Ali Amin Khan Gandapur, ten thousand fruit plants will be planted in Buner. He further said that during this campaign, the Forest and Watershed Division will plant fruit plants in all government departments, offices, schools, colleges, universities, police stations and courts so that these plants get water care and

are also protection. DC appealed to the public that every person should plant a plant in this campaign and make the environment healthy and the dear homeland clean and green. ### Hafizabad impacted by downpour

plantation campaign.

F.P. Report

HAFIZABAD: City and its surrounding rural areas have been severely affected by continuous and heavy rainfall over the past several days. The relentless downpour has inundated low-lying regions, damaging thousands of acres of agricultural land and destroying major seasonal crops such as paddy, vegetables, and fodder.

The already burdened farming community, grappling with skyrocketing prices of electricity, diesel, and fertilizers, is now facing further devastation due to crop destruction and

waterlogging. According to local farmers and agricultural representatives, the situation has become increasingly desperate. They lament that while they were already struggling to survive due to the absence of fair government support prices, the latest spell of torrential rains has shattered their hopes and pushed them toward financial collapse. Entire fields have been submerged, wiping out months of hard labor and investment, with no immediate support or compensation in sight.

Farmer leaders have called upon the government to immediately declare Hafizabad as a calamity-hit region and provide urgent relief to affected farmers. They have demanded a comprehensive damage assessment followed by timely financial assistance, interest-free agricultural loans, and provisions of subsidized inputs for the next cropping cycle. They also stressed the need for procurement of affected crops at support prices to prevent total economic loss

# Five dacoits killed during encounters

F.P. Report

notorious dacoits were shot dead in four police encounters in Lahore, Okara, Sialkot and Chiniot.

In the first police encounter, which took place in Nawankot area of Lahore, an accused who was in police custody killed by the firing of his colleagues. Sources said that a Crime Control Department (CCD) team was taking the accused Qasim Ali for recovery. The companions of the dacoit who were waiting for the police van started firing at the police van in a bid to free the dacoit from the police custody. The CCD team said that the police wanted the dead dacoit in more than two dozen cases.

The second encounter occurred in the Chak No 135 located in the jurisdiction of Rajoa Police Station of Chiniot, where one dacoit died after receiving serious bullet wounds from the firing of his com-

report, a heavy contingent After noticing the CCD of police rushed to the spot and cordoned off the entire dead dacoit is still unknown. Police after taking custody of dead body shifted it to the hospital. Police said that the remaining dacoits will be arrested soon. The fourth police encounter took place at Ladhar Chowk in the jurisdiction of Saddar Police Station, Sialkot. According to the details, a police team signaled three suspicious people who were riding a motorcycle to stop instead the dacoits started firing on the police party and escaped from the spot.

The police also started retaliation and cordoned The police team that was off the area. During the search the police party and two 30-bore pistols near the dead bodies. A spokesman of police said that one accused escaped from the scene, taking the dacoits.

# Tribesmen sit-in enters into 8th day

F.P. Report

entered its eighth day on Friday and concluded with a major breakthrough, as Alliance announced the temporary suspension of the protest following sucboth civil and military offi-

The alliance, which represents a coalition of local political leaders and civil society figures, had organized the protest to press for public demands centered on peace, economic revival, and natural resource ownership. Drawing significant support from tribal communities across the region, the sit-in became a powerful symbol of local unity and determination.

Throughout the weeklong demonstration, the persistently alliance emphasized the urgency of restoring law and order in the region, reopening the Angoor Adda border crossing to resume trade, and securing public ownership rights over local mineral resources. Following multiple rounds of negotiations, officials agreed to begin implementing demands immediately. A formal public announcement of the agreement was made in front of tribal elders and protest participants.

According to the alliance leadership, both civil and military authorities pledged to restore peace across the region, ensure the reopening of the Angoor Adda border within days after completing procedural for-malities, and formally recognize local communities as rightful owners of natumineral wealth. Officials further affirmed that the state bears full responsibility for guaranteeing security, safeguarding public economic rights, and maintaining transparent governance in resourcerelated matters.

During the announce- been an honor to serve in a The United clear that the sit-in is not Political Peace sit-in in being ended but merely Lower South Waziristan suspended. They cautioned that if the government fails to honor its commitments, a larger and more decisive the United Political Peace protest will follow. "We are giving the government time to act. But if promises are broken, we will return with cessful negotiations with a stronger protest that no one will expect," a senior alliance figure stated.

The alliance also confirmed that authorities had agreed to begin addressing all thirteen points of their charter without delay. They vowed to closely monitor implementation and ensure that the people's expectations are met in full. The reopening of the Angoor Adda trade route will proceed following administrative clearance, while mineral rights will be formalized in consultation with tribal stakeholders.

The alliance concluded by reiterating its commitment to peaceful democratic engagement but stressed that it retains the right to resume mass mobilization if progress falters.

Farewell gathering held in DC honour: Following the transfer of Deputy Commissioner Nisar Khan, a series of Commissioner farewell meetings were held in Wana by tribal elders, civil society representatives, and journalists, who praised his tenure and paid rich tribute to his contributions in Lower South

Waziristan. The farewell gatherings, held at the DC Office, drew participants from various segments of societyincluding tribal leaders, officials, government media personnel, and other influential figures-who came to acknowledge Khan's administrative efforts and public engage-

Speaking at the occasion, Nisar Khan expressed deep gratitude for the support and respect he received during his posting. "It has

ment, the alliance made it region where the people are hospitable, dignified, and peace-loving," he remarked. "The love and cooperation extended to me by the people of Lower Waziristan will always remain in my heart."

Reflecting on his tenure, the outgoing DC said he had strived to maintain peace, advance development work, and improve governance despite limited resources. "We made every effort to address public grievances sincerely and resolved several critical disputes through traditional jirga-based dialogue," he

### Pro-Palestinian demonstrator arrested at Tour de France

International

PARIS (AFP): A protestor wearing a t-shirt reading "Israel out of the Tour" was arrested after running onto the final straight of the Tour de France 11th stage. The protestor, who was also holding a Palestinian keffiyeh scarf, got past security barriers and ran towards the finish line in Toulouse Norway's Jonas Abrahamsen won a sprint

The man was intercepted by a race staff member and arrested, the local prefecture said. Several police officers have been assigned to protecting the Israel-Premier Tech team during the Tour. The team was set up by Israeli-Canadian billionaire Sylvan Adams, but there are no Israeli riders in this year's race.

With the Gaza war causing international controversy, last year the team said it had asked its riders not to wear jerseys with any reference to Israel while out training as a precaution. The Gaza war sparked by Hamas's attack on Israel on October 7, 2023, which resulted in the deaths of 1,219 people, most of them civilians, according to an AFP tally based on official figures. Israel's retaliatory campaign in Gaza has killed 58,573 Palestinians, mostly civilians, according to the health ministry in the Hamas-run territory.

### What led to the violence in Syria?

DAMASCUS: What started as a local conflict in southern Syria between local Druze and Bedouin communities over the weekend escalated into Israel bombing Syria's Ministry of Defence and other targets in the capital Damascus. At least three people were killed in the Damascus attacks, the Syrian Ministry of Health said. Other Israeli air attacks hit the southwestern provinces Suwayda and Deraa.

Suwayda - where the majority of the population are members of the Druze religious group - had been the epicentre of the violence in recent days. Israel had already struck Syrian Occupied government forces there earlier this week. Israeli officials claim their attacks on Syria aim to protect the Druze community in Suwayda, where scores of people have been killed in clashes involving local armed groups, as well as government forces. However, local activists and analysts say Israel is fueling internal strife in Suwayda by continuing to bomb Syria - as it has done repeatedly since former

President Bashar al-Assad overthrown was December. And Israel has continued to attack Syrian government forces, despite ceasefire agreements between some Druze leaders and the Syrian authorities. "Not only is Israel now painting the entire [Druze] community as pro-Israel but they are painting them as supporting Israel's bombardment of Damascus," said Dareen Khalifa, an expert on Syria and a senior adviser with International Crisis Group. The recent violence in Suwayda began Bedouin after groups kidnapped a Druze trader on the road to Damascus on July 11,

according to the Syrian Observatory for Human Rights, a United Kingdombased monitor. The abduction quickly turned into more widespread violence between the two communities - which have a longstanding rivalry due to land disputes - eventually dragging in Syrian government forces. Syria's new government has been attempting to impose its authority after a 14-year civil war and the end of half a century of alfamily Assad However, it has found it difficult to do so in Suwayda, partly because of Israel's repeated threats against the presence of any government forces in the province, which borders the Israeli-occupied Golan Heights. Suwayda's Druze removed. initially welcomed the deployment of government forces following the week-end's violence, but clashes

### Researchers try new ways of preserving more hearts for transplants

WASHINGTON (AP): Two universi- determine whether DCD organs are for adults and babies - advances that could help recover would-be heart donations that too often go unused. barriers for using organs from someone who dies when their heart stops. Called DCD, or donation after circulatory death, it involves a controversial recovery technique or the use of expensive machines.

Surgeons at Duke and Vanderbilt universities reported that they've separately devised simpler approaches to retrieve those hearts. In the New England Journal of Medicine, they described successfully transplanting hearts to a 3-month-old infant at Duke and three men at Vanderbilt. These DCD hearts work just as well as hearts from brain-dead donors," said Vanderbilt lead author Dr. Aaron M. Williams. Most transplanted

can raise questions about the quality put the little heart on ice and raced it of hearts. To counter damage and back to Duke.

ty hospitals are pioneering new ways usable, surgeons can pump blood and to expand lifesaving heart transplants oxygen to the deceased donor's abdominal and chest organs - after removing it from the donor's body, clamping off access to the brain. But it's ethically controversial to artifi-The new research aims to overcome cially restore circulation even temporarily and some hospitals prohibit that technique, called normothermic regional perfusion, or NRP. Another adding that Vanderbilt has performed option is to "reanimate" DCD organs in a machine that pumps blood and nutrients on the way to the transplant hospital. The machines are expensive and complex, and Duke's Dr. Joseph Turek said the devices can't be used for young children's small hearts - the age group with the most dire need.

Turek's team found a middle ground: Remove the heart and attach some tubes of oxygen and blood to briefly assess its ability to function - not in a machine but on a sterile table in the operating room. They practiced with piglets. Then made up 43% of the nation's deceased hearts come from donors who are came the real test. At another hospibrain dead. In those situations, the tal, life support was about to be body is left on a ventilator that keeps withdrawn from a 1-month-old the heart beating until the organs are whose family wanted to donate and who would be a good match for Circulatory death occurs when a 3-month-old Duke patient in dessomeone has a nonsurvivable brain perate need of a new heart. The injury but because all brain function other hospital didn't allow the conhasn't ceased, the family decides to troversial NRP recovery technique withdraw life support and the heart but let Turek's team test the experistops. That means organs can spend a mental alternative. It took just five while without oxygen before being minutes to tell "the coronary arteries recovered, a time lag usually doable are filling well, it's pink, it's beat-for kidneys and other organs but that ing," Turek said. The team promptly

Vanderbilt's system is even simpler: Infuse the heart with a nutrientrich, cold preservative solution before similar to how hearts from brain-dead donors are handled. That "replenishes the nutrients that are depleted during the dying process and helps protect it for transport," Williams explained, about 25 such transplants so far. "Our view is you don't necessarily need to reanimate the heart." There's a huge need for more transplantable hearts. Hundreds of thousands of adults suffer from advanced heart failure, yet many are never even offered a transplant because of the organ shortage.

Every year about 700 children in the US are added to the transplant list for a new heart and about 20% die waiting. Turek said infants are at particular risk. Last year, people whose lives ended via circulatory death donors - but just 793 of the 4,572 heart transplants. That's why many specialists say finding ways to use more of those hearts is crucial. The new studies are small and early-stage but promising, said Brendan Parent of NYU Langone Health, who directs transplant ethics and policy research. "Innovation to find ways to recover organs successfully after circulatory death are essential for reducing the organ shortage," he said. If alternatives pan out, "I absolutely think that cardiac programs will be thrilled, especially at hospitals that have rejected NRP.

# **Trump** toughening on Russia

IRING of empty talks with President Putin, US President Donald Trump announced that he had secured a deal with NATO to purchase weapons destined for Ukraine. Trump signaled a potential end to his fruitless attempts to pursue a constructive dialogue with Moscow by ramping up Western arms transfers to Kyiv and threatening severe economic retaliation against the Kremlin. Trump set Moscow a 50-day ultimatum to agree to a new security arrangement or face a 100% levy on Russian goods, alongside secondary tariffs on states that continue to buy Russian oil. When asked about 500% tariffs previously proposed, Trump argued that once a certain threshold is crossed, the specific percentage becomes largely symbolic. But while Trump's change in position was hailed, the devil is in the details. Fifty days is a long time in war and a period that notably overlaps with the expected timeframe of Russia's summer offensive, making any breakthrough in Kremlin strategy or on the front line during this period highly unlikely. Moscow's immediate reaction was to shrug off Trump's announcement.

The deadline also has the effect of delaying the passage through Congress of the Sanctioning Russia Act of 2025, which would introduce some of the most far-reaching economic measures ever imposed on Moscow and enjoys bipartisan support in the Senate. The bill comes at a time when the United States has already tried all sorts of carrots with the Kremlin to no avail. Washington's efforts at active diplomacy and softened rhetoric from the White House have fallen on deaf ears. This 50-day deadline could suffer the same fate.

The bill would mandate freezing the assets of senior Russian officials, military personnel, oligarchs and other individuals deemed to be supporting the Kremlin's war effort. Major Russian financial institutions, including the Central Bank, Sberbank and Gazprombank, would face new property-blocking sanctions, effectively cutting them off from the US and potentially even the global financial system. US institutions would be barred from processing transactions involving these banks or facilitating the listing of any Russian securities on US stock exchanges. The bill also includes stringent prohibitions on the US energy trade with Russia, barring the export re-export, or in-country transfer of all US-origin energy products to Russia. American companies would also be prohibited from investing in the Russian energy sector.

It goes even further by banning uranium imports from Russia and its affiliates. This restriction extends beyond direct imports to include third-party countries acting as intermediaries, reflecting an extraterritorial approach similar to past US sanctions regimes imposed on countries like Iran. This reinforces the 2024 uranium ban, which included similar measures but allowed limited imports under a waiver system until Jan. 1, 2028. While Russia once supplied about a quarter of the fuel used by US nuclear plants, the new restrictions are expected to accelerate investment in domestic enrichment, reversing a decades-long decline that began in the 1990s, when the US shifted from its own production to relying on downblended Soviet-era weapons-grade uranium.

Foreign companies aiding Russian oil, gas and uranium production would also face secondary sanctions. The bill requires the Treasury Department to enforce existing sanctions laws under the Countering America's Adversaries Through Sanctions Act. Regardless of the actual level of tariff, their addition on top of any duties that already exist sends a clear message to the Kremlin that the courtship phase of Washington-Moscow relations is about to end - and it will be the Kremlin's fault.

Washington-Moscow relations often follow a fivestage cycle after each American presidential election: an initial reset and re-engagement, a phase of cooperation, growing disappointment and a cold period of mistrust before the cycle starts all over again. This time, the short gap between the initial engagement and disappointment could set a new record. The bill also provides the president with limited authority to exempt specific countries. goods, or services from these tariff provisions. This waiver can only be issued if it is determined to be in the national security interest of the United States. However, the discretion is narrowly drawn: each exemption can be applied only once per country, good or service, and the exemption may not exceed 180 days. This reflects a deliberate strategy to limit carve-outs and prevent the erosion of the bill's deterrent power.

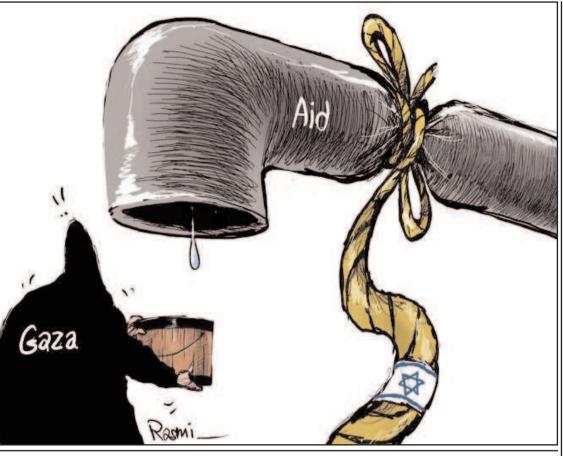

The cumulative effect of these measures is designed to erode Russia's ability to finance its war in Ukraine by depriving it of energy export revenue and access to foreign capital, pressuring major energy consumers, particularly China and India. Senator Lindsey Graham, who introduced the delayed bill, argued that these measures would be "bone-crushing" for Russia and that the threat of massive tariffs on trade partners would force a strategic recalibration among nations that have continued to deal with the Kremlin despite the invasion of Ukraine. But some experts argue that secondary tariffs risk backfiring. If applied to China and India, they could destabilize supply chains, send prices soaring and drive up US unemployment to recessionary levels.

On the other hand, the tariffs could serve a dual strategic purpose: pressuring countries like China to decouple partially from Russia's war economy and supporting Trump's agenda of reindustrializing the United States by incentivizing domestic production and reducing longterm dependence on geopolitical rivals. It would be sur-prising if, during the next 50 days, the Kremlin agreed to a deal other than the one it has been relentlessly pushing for years. While Trump might be right that the precise level of tariffs does not matter after a point, the bill's passage would have a symbolic value he may find appealing This could be the moment when Trump shows not only strength abroad, but domestically as well. After three years of war, nearly all of Russia's red lines have been crossed despite the fear of escalation that never came. While Washington is still reluctant to cross the few red lines that remain - notably Ukraine's accession to NATO

Trump's overdue recognition of Moscow's obstinate approach to negotiations is a welcome shift. Now, he has to follow through and prove that delaying the more ambitious sanctions package is worth it.

# What happens when 16-year-olds get the vote?

**Christine Huebner** 

Things are different now. and, in the UK, Wales and Scotland, 16- and 17-year-olds are already allowed to vote in some or all elections.

happens when 16- and 17this, and our main finding is simple: nothing bad happens when the voting age is lowered to 16.

Including 16- and 17-year-olds in the electorate does not change election outcomes and it does not make elections less representative. Sixteen- and 17year-olds are just as quali-Germany and Austria shows that they are able to pick a political party or representative that best represents their views to the same extent as other, slightly older voters.

But some things may get better for young people and for democracy overall, especially if young people are taken seriously as voters and receive good education on political issues. Here is what to expect when 16- and 17-year-olds get to vote in the UK general election.

When 16- and 17-yearolds get to vote at the next UK election, expect them to turn out in about the same numbers as other voters, and slightly more often than other first-time voters (those aged 18 to

Austria, Latin age to 16, my colleagues and I consistently find turn out at higher rates more

We believe this happens because younger people who are in full-time eduat home can make for bettime voters compared with 18- to 20-year-olds, who often experience their first election in a highly transitory phase of their lives, while moving out of the parental home, taking up work or further education.

A lower voting age is unlikely to change election outcomes. Sixteen- and 17year-olds make up between 1.5% and less than 5% of the population in constituencies across the UK. They will have a very small impact on vote shares - and only in the most extreme (and improbable) scenario that all 16vote in the same way.

**government** they do not all vote for the has announced it same political parties. In will lower the vot- Brazil, young people ing age to 16 for all UK voted quite similarly to elections in time for the other age groups in the next general election. In 2022 presidential election 1969, the UK became the and in Austria, where first major democracy in young people have been the world to lower the enfranchised since 2007, voting age from 21 to 18. the inclusion of 16- and Few people knew what to 17-year-olds in the elecexpect from this change. torate did not change the political landscape. Even In places such as Austria, for marginal elections, Argentina and Brazil, as such as Scotland's 2014 well as parts of Germany referendum on independence, my colleague Jan Eichhorn from University of Edinburgh showed that the inclusion of 16- and 17-year-olds We can learn a lot from did not change the outthese places about what come of the referendum as the youngest first-time year-olds get the vote. My voters cast their votes in colleagues and I have diverse ways. Any politispent years researching cal party can win the support of first-time voters. To do so, political parties have to engage with young people and offer attractive policy proposals, as Laura Serra shows.

We might also see the media show more younger voters in their reporting. In 2014, BBC Scotland raised the visibility of 16fied to vote as other, older and 17-year-olds by creatvoters. Research from ing a diverse panel of young first-time voters, who provided input into programmes, were panellists on productions on different political topics, and audience members for the final referendum TV debate.

Young people who are allowed to vote also influence the adults in their lives. If young people are allowed to participate in elections at 16 and 17, when most are still living at home with their parents, they have the potential to shape political discussions within the family or household. In an ageing society, political parties and a media that engage with younger voters, and dinner-table conversations about political issues and across generations, can be a good outcome.

In the longer term, America, Scotland, Wales including 16- and 17-yearand German federal states olds in the electorate that lowered the voting might make democracy more resilient. In Austria and Latin America, young that, when allowed to people who were enfranvote, 16- and 17-year-olds chised at 16 or 17 were satisfied with than young people who democracy and democratic were enfranchised at age institutions - parliament or political parties

The lowering of the voting age might also provide an opportunity to cation and often still live address inequalities in who participates in electer, more engaged first- tions. Across all ages we see stark differences in who turns out to vote and who does not. After the lowering of the voting age in Scotland, however, we found 16- and 17-yearolds to be equally engaged with elections, regardless of their social background. Schools and colleges

play a crucial role in compensating for the lack of parents or peers to get young people voting. Good and statutory civic education for all young people makes a big difference for democracy in the long term. Austria has done well in combining and 17-year-olds turned the lowering of the voting out to vote and decided to age with a big reform of and investment in civic Those who say that and citizenship education. lowering the voting age to In Scotland, young adults 16 is Labour's move to who remembered taking secure more votes at the classes in school in which next general election political issues were dismight be mistaken. Young cussed were more likely to people as a group have turn out in elections diverse political attitudes; throughout their 20s.

POW in Ukraine for more than a year. "Our boys and we, their families, have gone through so much during this time. Enough. Return them home after the exchange, not to the war," Frolova said in a video that circulated online

journalists that their relative was sent back into military service right after a prisoner exchange Kirill Putinsev, 23, who

whose husband, Alexei Putinsev was sent to a psy-Frolov, has been held as a chiatric hospital in Russian-

occupied Donetsk, his sister said. In the Pskov region, Vasily Grigoryev, 32, and Dmitry Davydov, 45, were drafted into the 1009th Motorized Rifle Regiment following Russia's September 2022 mobilization. They were later sent to last month. Similar cases have been reported before. A fight in Ukraine, where they family from Russia's Far spent over six months in East Žabaikalsky region told Úkrainian captivity.

After being released in a 195-for-195 prisoner swap, Russian commanders redeployed them to the Kharkiv front where they were tasked was recruited to fight in with evacuating the wound-2024 while serving a prison ed and the dead. The two sentence for theft, returned men eventually escaped to Russia after a swap in from their military base and May 2025 - but he "wasn't hitchhiked to Moscow, even allowed to go home for where they sought legal a single day" and was assistance. According to "denied even a referral to a lawyer Maxim Grebenyuk, his sister Yana and Davydov, the Russian breakdown, that the servicemen did not

fall into the specific categories of prisoners of war subject to direct repatriation. These categories, according to the Geneva Convention, are the terminally wounded or ill and individuals whose physical or mental capacities have been severely diminished.

Yet Article 117 of the Geneva Convention on the Treatment of Prisoners of War says "no repatriated person may be employed on active military service." It is impossible to estimate how many former Russian prisoners of war have been sent back to the front by order of Moscow, as official lists of those who have been exchanged and those currently serving in the Russian army are not publicly available. Last year, Ukrainian Volodymyr President Zelensky signed a law that exempts former prisoners of war from mobilization.

According to the group Idite Lesom ("Get Lost"), which helps Russians avoid of publication.

participation in the war, 'several dozen" former POWs who were forced back to the front after being exchanged contacted the organization last year asking for help. Sergei Krivenko, director of the Citizen. Army. Rights group, told The Moscow Times that his organization has received complaints from relatives of POWs who were sent back to the front after being exchanged, as Russian authorities continue to treat them as active-duty soldiers. The Moscow Times requested comments from Russia's Defense Ministry and human rights commissioner Tatiana Moskalkova, who handles POW cases and has said that "every search request goes through me personally." The Moscow Times also asked Ukraine's Coordination Headquarters for the Treatment of Prisoners of War for comment. None had responded to these requests by the time

# Is Belarus coming in from cold following a US visit?

**Artyom Shraibman** 

Trump's special envoy Keith Kellogg met with Alexander Lukashenko in Minsk on June 21. The contested Belarusian leader marked the visit by releasing fourteen prisoners, mostly political detainees. More than half were nationals of Western countries, but the most high-profile and unexpected release was that of Siarhei Tsikhanouski, one of the leaders of more than five years in prison.

Kellogg's visit was made possible by the convergence of two complementary interests. The Trump administration is keen to revive at least some sort of regional diplomacy amid the stalled peace talks on Úkraine. For his part, Lukashenko has long made clear his desire to emerge from the isolation of recent years to play a more significant role in the region. To that end, he is prepared to make concessions. Releasing political prisoners is an easy win for him. After all, more than 1,100 remain behind bars - and more people can always be put in jail. So Lukashenko has bargaining power, as long as he can find a

Minsk released the first United States citizen in late January, during Trump's first week back in the White employees of the US news service RFE/RL back in the fall of 2024, the timing sent a clear message: now White House, ready to make deals start to succeed where his predecessor had failed. Two weeks later, three more political prisoners were released, including a US citizen and leader of the Belarusian opposition. mately became the recognized needs to be geopolitical as well as long while, Washington is prepared humanitarian. For example, Minsk to play along.

RFE/RL journalist. When Deputy Christopher Smith came to Minsk to accompany them home, he met with Lukashenko, and The New York Times reported that they discussed a political prisoners in exchange for lifting some US sanctions.

last political prisoner with US citithe 2020 protests, who had spent zenship, Yuri Zenkovich, who was escorted from Belarus by Kellogg's deputy John Cole. It is likely that this is when Minsk began its dialogue with one of Trump's main negotiators on Ukraine. It is not yet clear whether Lukashenko will receive anything in exchange for the latest round of political prisoner releases. The meeting with Kellogg was in itself a breakthrough for Belarusian diplomacy by the standards of the last five years and may be enough to satisfy Minsk for now.

In any case, it is dangerous for Lukashenko to get ahead of himself at a time when US-Russian negotiations have come to a standstill. It is important to move in sync with Russia, where possible, or risk punishment from the Kremlin. By releasing Tsikhanouski, Lukashenko House. Though Washington had begun discussing with Minsk the release of US citizens and former announcing that he would run for president in 2020, was Lukashenko's most defiant opponent and the greatest threat to his three decades in that a pragmatic leader was in the power, having started the first regional protests even before the conversation with the EU, to implewithout liberal moralizing, he would election. Following his imprison-Tsikhanouski's Sviatlana, ran in his place and ulti-

Tsikhanouski did not become any Assistant Secretary of State less defiant once behind bars. Even in the pretrial detention center, at an impromptu meeting of opposition leaders with Lukashenko, he hinted that not only could the Belarusian "grand deal" - a mass release of autocrat himself face problems in the event of a change in leadership, but that his children could, In April, Lukashenko released the Lukashenko would later publicly bring up those threats on more than one occasion. And yet, all of a sudden, despite these grievances, Tsikhanouski became the first of the opposition leaders imprisoned in 2020 to be released. Lukashenko is signaling to the West that he is, in principle, ready to release any political prisoner: there are no red lines, people just need to

keep talking to him. While Kellogg's visit is obvious progress, the ultimate outcome of such conversations remains unclear. Minsk still has plenty of prisoners to use as bargaining chips, while the United States can send more delegations or even reopen its embassy in alone will not be enough. Sooner or later, Minsk will expect sanctions to be eased, and then the EU's tougher position is likely to become an obstacle. Without the lifting of EU showed just how highly he values sanctions, American concessions this level of US attention. will not be enough to unblock Belarus's key trade flows, but there are no signs so far that the EU has any inclination to follow in Washington's footsteps by resuming dialogue with Lukashenko.

Minsk is counting on Washington ment the "Western" part of the grand Washington's interest in Lukashenko

needs to show the White House it has a role to play in bringing peace to Ukraine. As special envoy on Ukraine, Kellogg is the best person to engage in such a conversation. But it is still unclear what exactly Lukashenko could try to offer him. Back during the earlier Minsk negotiations aimed at resolving the Ukraine conflict prior to Russia's full-scale invasion in 2022, Belarus was at least a diplomatic platform, if not a mediator. Now, its role has been reduced to a location for Russia and Ukraine to exchange prisoners of war. No one is planning to move the latest peace talks from Istanbul to Minsk and Lukashenko has no levers of influence over either Russia or Ukraine.

It is possible that Washington has low expectations and simply wants to show that it is having at least some local successes amid the deadlock in talks between Russia and Ukraine. Or perhaps Trump's advisors have become so desperate to find an effective approach to Moscow and Kyiv that they are Belarus. But diplomatic gestures even prepared to consider following advice from Lukashenko, especially since those loyal to him like to describe him as a rare connoisseur of Putin's thinking, and therefore an extremely valuable interlocutor for the West. In any case, it is unclear how Minsk could influence the course of the war or the peace talks even if it wanted to. Until Moscow has sufficient incentives to abandon its maximalist demands or Kyiv has sufficient reasons to accept them, there will be to intervene on its behalf in a future no progress, regardless of Minsk's position. But Lukashenko is trying to squeeze as much out of the deal deal. But for that to happen, prospect of peace talks for as long as he can and, for the first time in a

# This data omnishambles is merely high water mark of MoD ineptitude

**Sherelle Jacobs** 

F Britain retains one superpower, it is its talent for building useless bureaucracies. No government department epitomises this quite like the Ministry of Defence. Once among the nation's most reputed institutions, inheriting the prestige of the victorious British Armed Forces when it was formed after the Second World War, the MoD has grown bloated and unaccountable. What senior politicians now regard as the most elaborate but inept administrative opaque of all departments seem- units. ingly holds public accountability in contempt. The UK defence "blob" has reached a point where it is imperiling national security. There must be a reckoning.

embodies everything wrong with forces, which routinely remove MoD behemoth - but it has achieved the British state. It has abused both commanding officers who fall little. Much of the dead-weight that the legal system and its position as the guardian of national security to conceal an extraordinary error. The marine who leaked the list in question was working out of the headquarters of the elaborately covert

Directorate of Special Forces. And yet its protocols for email security apparently fall short of those enforced at British blue-chip firms. One insider tells me it would be "shockingly easy to be a Snowden in the Ministry of Defence". The blunder is not a freak occurrence, but rather the high water mark of the MoD's institutional failure. This is not the first at the Ministry of Defence. Perhaps major Afghan-related data leak. From laptop thefts to unclassified documents being left at bus stops, breaches have been all too common.

The MoD's dysfunction extends more toxic. beyond the cybersphere. It is

grotesquely overstaffed: Finland, arrangement set in, whereby politi-

which commands a larger wartime cians went along with officialdom's force than Britain, has just 150 defence civil servants, yet the MoD has almost 38,000 on its payroll. Bureaucratic judgment has become pathological, swinging between "indecision, decision by default, and terrible decisions". It is not just in the realm of cyber technology that the MoD excels at building

department Frankenstein's monster, possessing the worst attributes of both the mil-Armed Forces seldom punish failshort. "In Britain you are more likely to be removed from post for having romantic relations with a subordinate than presiding over a blunder that endangers lives," one former Navy officer tells me. The MoD is equally imbued with the patrician impulses of the civil service. As the historian David Vincent tells me, the civil service's ethos of "honourable secrecy" goes back to the 19th century, summed up by the mantra: "A secret may be sometimes best kept by keeping the secret of its being secret." It won't be easy to bring an end to the chaos more than any other department, it has proved impervious to reform. The Tories failed miserably at the task - and may have made things

strategy for dealing with administrative blunders, while civil servants and senior military officers became "spinmeisters" for a cash-strapped government in crisis, "bigging up" its achievements, even as it allowed military capacity to be dangerously run down. The chilling culture shift under the Conservatives is even said to be reflected in the changes to the design of the MoD's headquarters, which used to be open-plan but has, over the last few years, morphed into a "kind of souk, with certain itary and civil service. The British floors hived off for niche things and enclaves locked off". Labour came The MoD's omnishambles ure, in contrast with American to office vowing to get a grip on the

Defence Minister John Healey tried

brief were placed in lucrative hold-

ing posts - and are now being brought back in. The "blob" has allegedly already neutered the consultants Healey has hired to drive reform; officials have manoeuvred to ensure that these disruptors will now merely "manage" the reform process. Top military brass nonetheless hope that Healey can get a grip. One adviser told me that they are encouraged by the contents of his reform strategy and the leadership team that he is bedding in. The incoming Chief of Defence Staff, Rich Knighton, is held in high esteem. Labour needs to get its act together and drive root-andore toxic. branch reform. Nobody has yet Insiders wonder whether a tacit been held accountable for the

All those implicated in a cover up must answer for their conduct. Super-injunctions need to be abolished so that it is no longer possible for officials to use them to shield themselves from basic levels of scrutiny. Healey must reverse the incredible disintegration of professional standards within the MoD. One former employee recalls that even 20 years ago, sending an intelligence document with a single wrong digit was a sackable offence. Apparently today, a mistake that costs taxpayers billions of pounds and puts national security and fragile social cohesion at risk only warrants a shift in posts. It's bad enough that intelligence services of hostile countries are dedicating ever- electricity consumption in greater resources to penetrate this the country during the sum- dense foliage, such court- use traditional architectural country's security, without our inept | mer months. However, probureaucracy giving our secrets to get rid of when he first got the away for free. It is bad enough that public trust in the political class is at an all-time low, without officialdom resorting to celebrity-style gagging orders to cover up its errors.

Put simply, it is fundamentally unacceptable that those who are charged with minimising the dangers facing the realm should show such an impressive capacity to simultaneously aggravate all of the country's pressing problems. Keir Starmer is being sucked into a civil war with his party's far-Left as he seeks to re-establish discipline after the welfare reform fiasco. But he needs to turn his attention to the insubordination and chaos at the MoD. It is time for the Prime Minister to show some mettle and take drastic action.

The Telegraph

# Lai's lectures blare division, no 'unity'

AIWAN leader Lai Chingte's so-called "ten lectures on unity" - he has delivered only four - is not a call for 'national unity "but a calculated "legal offensive" by separatist forces in Taiwan to systematically repackage the "Taiwan 'agenda. By independence weaving together historical, cultural, political, legal and international rhetoric, Lai is trying to

develop a new theory of "com-

prehensive independence".

As a self-proclaimed "pragmatic worker for Taiwan independence", Lai has made separatism his political identity and mission. His ambition is to exploit every opportunity to pursue "Taiwan independence" and position himself as a "player", not a pawn, in the geopolitics surrounding Taiwan. But his so-called "unity doctrine" political rhetoric, which lacks historical and legal basis. His rhetoric on subjects like "nationhood", "unity", "statute", and "national defense" is wrapped in populist language. Most alarmingly, his arguments distort the legal foundation of the 1992 Consensus, posing a serious threat to cross-Strait relations, the international legal order, and regional peace and stability.

Lai's legal claims for "Taiwan the influence of Dutch, Spanish, independence" are based on six and Japanese cultures on Taiwan main points: denying that "Taiwan has ever been part of China"; arguing that "Taiwan's modernization and international character are the result of Western colonialism, with deeper links to the Netherlands, Spain and Japan than the Chinese mainland"; claiming that "Taiwan is part of the Austronesian (language) family and not the Chinese foreign powers for some time, family", and therefore "has the none of this changed its legal iden-

**Tian Feilong** 

right to national self-determination"; asserting that "UN General Assembly Resolution 2758 did not resolve Taiwan's status", and hence "Taiwan has the right to join the United Nations"; claiming that 'Taiwan and the mainland are separate, sovereign entities"; and insisting that "the future of Taiwan be decided solely by its 23 million residents". These denials and claims strike at the heart of the 1992 Consensus that there is only one China and, therefore, must be firmly refuted.

First, that Taiwan has been part of China since ancient times is based on historical facts that China has always been one unified country, and its territories, including Taiwan, are inseparable. In contrast, Lai's argument borrows from is a disjointed compilation of colonial notions of statehood, in which sovereignty is acquired and prolonged control. This legal Western framework, designed to divide colonial territories, doesn't reflect the organic formation of nation-states such as China.

Second, Taiwan's colonial past does not alter its legal status as Chinese territory. Lai highlights residents as if they granted Taiwan a separate global identity. This is both misleading and disgraceful. Colonialism is universally condemned today, and colonial rule does not confer sovereignty. UN resolutions on decolonization are based precisely on this principle. Although Taiwan was occupied by

tity as a Chinese territory. Third, Taiwan's return to China was a direct outcome of the Allied forces' victory in World War II and its legal legacy. Despite foreign occupation and conflict, the Chinese nation never gave up its sovereignty over Taiwan. After all, the Chinese people on both sides of the Taiwan Strait jointly resisted foreign invaders, reinforcing

shared Chinese identity.
This year marks the 80th anniversary of the victory in World War II and the end of Japan's colonial rule in Taiwan. The Cairo Declaration Potsdam and Proclamation affirmed that Taiwan will be returned to China. And in 1945, the Chinese government took over Taiwan. Although political changes in 1949 led to the establishment of separate administrations across the Strait, it did not through occupation, declaration alter Taiwan's legal status as part of China. Lai has cited the 1951 San Francisco Peace Treaty to claim Taiwan is a "separate country". But this contention is legally invalid because the treaty excluded China and promoted Cold War agendas. And a unilateral agreement has no validity in international law.

The legal foundation laid by postwar treaties and the fact that both sides of the Strait belong to one China gave rise to the 1992 Consensus, which remains essential for the peaceful reunification of Taiwan with the motherland, which Lai is vehemently opposed to. And fourth, although the People's Republic of China was founded in 1949, it had to wait until 1971 for rightful seat in the UN to be restored because of

Cold War divisions and Western intervention. UN General Assembly Resolution 2758 conclusively resolved the issue of Beijing's representation and Taiwan's legal status, restoring Beijing's lawful representation and expelling Taiwan's representatives from the UN.

Yet separatist forces on the island and their Western backers continue to twist the resolution's meaning, pushing the false narrative of "undetermined status".US laws such as the "Taiwan International Solidarity Act", and Lai's "diplomatic breakthroughs" are aimed at creating a legal basis for "two Chinas" or "one China, one Taiwan". But the UN and most of the countries across the world continue to abide by the one-China principle, making "Taiwan independence" impossible. In short, that Taiwan is an integral part of China is a historical and legal fact. international community rejects Lai's separatist claims. What Lai calls a legal theory is, in fact, an opportunistic fantasy, legally baseless, politically destabilizing and practically impossi-

By promoting this illusion, Lai is trying to not only undermine regional peace; he has also exposed the inherent contradictions and dangers of so-called 'legal Taiwan independence". The more these ideas are promoted, the more clearly the international community, and residents on both sides of the Strait will accept the reality that there is only one China, and Taiwan is part of it. The march toward reunification is unstoppable. And no amount of rhetoric can change that.

# How Old Dubai's historic streets beat extreme heat

ONG before our reliance on air-conditioning, Dubai's old town kept people's homes cool using a combination of clever techniques to lower the temperature. The same basic techniques are being revived again today. There's no heat like the heat of a Dubai afternoon. It is relentless - and often reaches deadly temperatures. But there's a littleknown part of the city where you can cool down, and do so the old-fashioned way, without air conditioning.

As I step out of the heat and into the narrow lanes of the Al Fahidi Historical Neighbourhood, part of Old Dubai, I find refuge from the midday Sun. The shaded alleys here, with their high walls, seem to conjure breeze from cool nowhere. A kind of merciful magic. Desert winds cooled and somehow tamed. The people who built this place really knew what they were doing. Above me, I see four storey-tall wind towers rising against the sky - ingenious structures that once cooled dwellings below. Today here in Dubai, they are home to pigeons. In this calm, more modest part of the city, luxury gives way to creativity and functionality. In the architecture of the streets, you can read the environmental wisdom of a people who worked out now to survive the desert.

Parts of the Al Fahidi Historical Neighbourhood passively cooled, heatwave-resistant designs of becoming more relevant today. They are inspiring contemporary architecture and even entire cities. to places like Old Dubai for inspiration as they rush to respond to climate change and the threat of rising global temperatures. And no wonder. If clever architecture can keep people in Dubai cool, could it help keep the rest of us cool too Last year, temperatures in Dubai reached a scorching 51C and outdoor "feels like" temperatures - which take humidity into account were as high as 62C. Air conditioning is widespread in the United Arab Emirates' (UAE), accounting for more than 70% of ponents of traditional. sive cooling techniques say

massive electricity bills. "The Emiratis built houses that were completely desert-proof," says Noor Ahmed, my tour guide. Wind towers were used to catch the cool air from outside and drive out the hot air from inside," he adds. Gesturing labyrinthine alleyways of the old town, Ahmed points out how the high walls protect pedestrians from the blistering sun. After Old Dubai emerged from the sands of time in the 1700s, it became a popular residential area when the ancestors of today's Emiratis transitioned from a nomadic to a more settled lifestyle along the Dubai Creek, a natural saltwater inlet that runs through the city.

these tried and tested

approaches to shading

buildings and managing air

flow could help people beat

the heat without racking up

The city's original inhabitants designed ingenious homes that could withstand the harsh climate of the Arabian Desert. They used technologies such as wind towers or wind-catchers known as barjeels, enclosed courtyards, latticed windows called mashrabiyas, coral stone houses, and narwalkways called sikkas. "The beauty of Al Fahidi's architecture lies in the fact that it uses several passive cooling techniques that work in tandem to keep the neighbourhood cool, says Ahmed Al-Jafflah, senior cultural speaker at Dubai's Sheikh Mohammed bin Rashid Al Maktoum for Cultural Centre Understanding, a nonprofit organisation that promotes Emirati culture and history. 'Our ancestors built a holistic architectural system that optimised wind quality, enhanced shade and minimised exposure to the Sun - all of which were crucial to maintaining comfortable temperatures in Old Dubai," he adds.

Barjeels, or traditional wind towers mounted on rooftops, create natural ventilation and cooling inside buildings by capturing breezes at a higher elevation and redirecting them The China Daily inside. That cool air is then ability. The district's urban

layout, consisting of closely spaced buildings and narrow streets, maximises ing while warm air rises shade and harnesses prevailing winds for natural ventilation, lowering ambient temperatures by as tures by nearly 10C. much as 10C versus the surrounding environment. The buildings there incorporate passive cooling features, including wind towers and perforated facades, meaning they consume 40% less energy than conventional buildings in Abu

Officials say that such innovations have helped the city to cut its overall energy consumption by 38.4% "Masdar City has smartly revived old Emirati design reliance on mechanical cooling," says Sherihan Alshahed, assistant professor of sustainable urban communities at the Arab Academy for Science, Technology & Maritime Transport in Egypt. "Because these techniques are low-cost and low-tech,

The district's urban layout, consisting of closely spaced buildings and narrow streets, maximises shade and harnesses prevailing winds for natural ventilation, lowering ambient temperatures by as much as 10C versus the surrounding environment. The buildings date to the 1700s. But the there incorporate passive cooling features, including wind towers buildings here are only and perforated facades, meaning they consume 40% less energy than conventional buildings in Urban planners are turning Abu Dhabi. Officials say that such innovations have helped the city to cut its overall energy consumption by 38.4%. "Masdar City has smartly revived old Emirati design elements that reduce reliance on cooling," mechanical Sherihan Alshahed, assistant professor of sustainable urban communities at the Arab Academy for Science, Technology & Maritime

> study in Spain found that this form of architecture 18%. Furthermore, the villa walls in the Al Fahidi Neighbourhood feature perforated window screens called mashrabiya that are used to control lighting. One 2024 study that simulated the effect these devices can have found that they could also reduce indoor temperatures by at least 3C. "Old Dubai courtcomforts of natural light, cool air and shade but also provide a private, secure and tranquil inner space for the residents of the house, thus adhering to the local design principles of privacy and protection," Mhatre.

Transport in Egypt.

While Emiratis once used light-coloured coral to reflect light and reduce heat absorption by buildings, the UAE now prohibits the extraction of coral, in order to protect marine life. Using lighter colours on building exteriors, however, remains one of the best ways to reduce temperatures inside buildings. Old Dubai buildings also sport features such as cladding and vegetation including tall palms, which help to shade buildings. "Perhaps the most underrated, but equally essential, passive cooling mechanism at work in Al Fahidi is the sikka", says Al-Jafflah. Sikkas, a traditional Emirati architectural feature, are narrow pedestrian walkways, not broader than 2-3m (6.5-10ft), that run among villas and lead pedestrians to Optical Glass House in open public spaces. They Hiroshima, Japan, are two allow unrestricted circulation of air, often yielding a pleasant breeze from the Dubai Creek. "Tourists love to sit and relax in the sikkas on our walking tours. They are so cool and peaceful," adds Al-Jafflah.

Architects in the UAE have used traditional design principles to create buildings that passively manage extreme heat. Take Masdar on the outskirts of Abu cant temperature variations Dhabi that aims to be and insulation need to be world-leading in sustain- considered.

yards provide protection designs inspired by the hissand and toric buildings minimise Sun exposure. A Dubai. Madinat Jumeirah, a luxurious complex of residential and commercial could lower a dwelling's buildings in Dubai, has sevcooling demands by up to eral wind towers and a maze of narrow lanes to improve wind circulation, thereby creating a cooler microclimate. At Khalifa Al Tjer Mosque, one of the most recent additions to Dubai's skyline, small openings at the top and bottom of its pillars facilitate vertical air movement. "While not a full traditional barjeel, this design cleverly yards not only offer the utilises [wind catching technology] in a contemporary scenario, which cools the space without relying entirely on artificial systems," says Mhatre. Wind towers and their modifications are now a common sight all over the world. From the Royal Chelsea Hospital in London, UK, to Windcatcher House in Utah, USA.

#### Pak to feature in World **Squash events**

ISLÂMABAD (APP): Pakistan junior team departed to Egypt on Friday to feature in the World Junior Individual Squash Championships and World Junior Team Squash Championships, taking place in Egypt from July 21 to August 1. The Pakistan contingent is all set to make their mark on the world stage, led by Sqn Ldr Atif Kamran (Team Manager) and Coach Faraz Muhammad, the talented young players are ready to give it their all in the championships, said a press release. The players include Anas Ali Shah, Abdullah Nawaz, Umair Arif and Yahya Khan. The Pakistani contingent departed from Islamabad Int'l Airport, filled with enthusiasm and pride to

### Pakistan begin training in Dhaka

represent Pakistan.

DHAKA (Monitoring Desk): The Pakistan national cricket team Friday held its first training session at the Sher-e-Bangla National Stadium, gearing up for the upcoming T20 series against Bangladesh. After a day of rest following their arrival, the players took to the field for a comprehensive practice session. Under the watchful eyes of the coaching staff, the squad began with warm-ups before diving into focused fielding, batting, and bowling drills. Batters trained in the nets with tailored sessions designed to suit the local pitch conditions, while bowlers delivered spells with full rhythm and intensity. The energy at the ground reflected the squad's intent to make a strong start to the tour. The three-match T20I series kicks off with the first game scheduled for July 20.

### Ince banned for drink-driving

Former Liverpool and Manchester United star Paul Ince has been banned from driving for 12 months and ordered to pay £7,085 (\$9,524) after a drinkdriving offence. Ince admitted driving his black Range Rover while over the limit on June 28 in Cheshire. The ex-England captain had a reading of 49 microgrammes of alcohol in 100 millilitres of breath when he was stopped by police, Chester Magistrates court heard on Friday. Nigel Jones, prosecuting, said: "On the day in question, the defendant was witnessed by an off-duty police officer driving a vehicle perceived to be swerving across the road." He said the 57-yearold's car swerved across the central reservation, hitting bollards and causing two tyres to burst. Frank Rogers, defending Ince, said: "My client finds himself today facing the huge impact of a ban, but he accepts he only has himself to blame for that. "He misjudged the fact he believed at the time he would be under the limit." Rogers said Ince had been at Heswall Golf Club and had not eaten before having two drinks in the clubhouse. "He felt fine to drive, of course we now know that he shouldn't have done," Rogers said. District Judge Jack McGarva told Ince: "The message has got to be if you're going to drive you don't drink at all." Ince, who also played for Inter Milan West Ham, earned 53 caps for England, winning two Premier League titles among a host of trophies during his six years as a United midfielder. He moved management after retiring, with his most recent spell in

Prime Shehbaz Sharif extended his congratulations to the volleyball team, praising their performance and expressing pride in the achievement.

"It is indeed heartening to see Pakistan reach the final by defeating India in such a convincing manner. The entire nation takes pride in the achievements of its youth. We pray that Allah Almighty grants success Pakistan have advanced India, maintaining an to the team in the final as

### Pakistan's Hasnain clinches IBSF U17 Snooker world title

KARACHI (Monitoring Desk): Pakistan's rising snooker star Hasnain Akhtar clinched the title at the IBSF World U17 Snooker Championship with a dominant display in the final, defeating Wales' Riley Powell in a one-sided encounter on

Hasnain outclassed his Welsh opponent with a straight-frames victory, securing the final 4-0. The 16-year-old Pakistani cueist produced frame scores of 86-7, 73-35, 50-31 and 98-4, showcasing his class and composure on the global stage.

The match, officiated by Bahrain's Nadhem Ahmed, saw Hasnain deliver two notable breaks of 44 and 67 in the first and fourth frames respectively, underlining his control throughout the

Powell make an impact, with Hasnain never allowing him to settle into rhythm.

With this victory, Muhammad Hasnain has become the first Pakistani player to win the IBSF World U17 Snooker Championship. He adds this title to his growing list of accolades, having also won the Asian U21 Championship earlier this

This is Pakistan's first IBSF title in the U17 age group since the global body restructured its junior categories in 2023, converting the Under-18 championship into the current U17 format. The last comparable triumph came in 2017 when Naseem Akhtar, another rising star from Pakistan, won the IBSF World Under-18 Championship.

Hasnain's triumph adds to Pakistan's growing prominence in the global snooker arena and offers hope for a brighter future for cue sports in the country.

# McIlroy eager for British Open glory on home soil

McIlroy said he will need definitely good enough to to turn flashes of brilliance make a run," McIlroy told into firing on all cylinders for his final two rounds as the weekend. he aims to win the British Open on home soil at Royal Portrush.

sits at three under par, five behind clubhouse leader control and have it sort of Brian Harman, after the opening two days of his return to Northern Ireland.

After a rollercoaster first round that contained five birdies, four bogeys and a series of wild tee shots, McIlroy was more controlled on his way to a 69 on Friday.

"I feel like my game's reporters. "I'm excited for

close to my best over the first two days in little bits The Masters champion here and there. I'm going to need to have it all under all firing over the weekend to make a run."

to six years ago when he failed to make the cut at Portrush in the first staging of the British Open on the

The world number two said he felt both the pressure and the privilege of enjoying the "support of a "I've been somewhat nation" during his opening round on Thursday, but is trying to harness the atmos-

phere to bring out his best. "It was 20 years ago that I played the North of Ireland here, and never in my wildest dreams did I think that I'd be McIlroy has at least coming back as a Grand Slam ensured he will be around champion with the support of for the weekend, in contrast a nation behind me trying to win an Open Championship, added McIlroy.

"I count myself very grateful and very lucky that island of Ireland for 68 I'm in this position."

# Man Utd agree deal to sign Brentford winger Mbeumo

LONDON (AFP): Manchester United 1973-74. Rasmus Hojlund and Joshua have reportedly agreed to sign Cameroon a deal worth an initial £65 million (\$87 million) as Ruben Amorim steps up his overhaul of the team's misfiring attack.

Mbeumo attracted Amorim's attention with 20 goals in 38 Premier League games for Brentford last season. Tottenham, now managed by former Brentford boss Thomas Frank, were also chasing the 25-year-old before United's improved offer sealed the deal after their two previous bids were rebuffed.

United will pay an additional £6 million in potential add-ons to Brentford.

Mbeumo is due to undergo a medical in time to travel to the United States on Tuesday as Amorim's men start their preseason tour. He is set to become United's third signing since the end of last season, joining Wolves forward Matheus Cunha and teenage Paraguayan defender Diego Leon at Old Trafford. Amorim has been determined to revamp United's forward options after a woeful campaign.

They suffered a toothless 1-0 defeat against Tottenham in the Europa League final and a 15th-place finish in the top instrumental in their impressive 10thflight that ranked as their lowest since place finish in 2024-25.

Zirkzee struggled as Amorim's main winger Bryan Mbeumo from Brentford in strikers last term. Amorim has reportedly told Alejandro Garnacho to look for a new club, while Marcus Rashford and Jadon Sancho are expected to leave following their loan spells at Aston Villa and Chelsea respectively.

Mbeumo will be Amorim's latest new recruit in his bid to revitalise moribund United. Having already paid £62.5 million for Cunha, United's spending spree comes despite their failure to qualify for the Champions League costing the club a minimum of £70 million.

The versatile Mbeumo is able to operate in a variety of roles on the flanks or in central attacking areas.

His pace, creativity and clinical finishing should be a significant boost to

Mbeumo blossomed in six years at Brentford, scoring 70 goals and providing 51 assists in 242 appearances in all competitions following his move from French club Troyes in 2019.

He helped the Bees win promotion to the Premier League in 2021 and was

# Henry's three wickets set up the win as NZ cruise past Zimbabwe

Zimbabwe T20I tri-series points table after a second successive win, this time over the hosts. After New Zealand's bowling attack kept Zimbabwe to 120, the lowest first-innings total of the tournament so far, their batters polished off the required runs inside 14 overs, which helped their net run rate balloon to 1.919.

Zimbabwe remain without a point, and with much Conway work to do to avoid being knocked out of their own competition. They need to win both of their next two games, against South Africa and New Zealand, to progress to the final, and will need a major improvement in their batting to get there.

Zimbabwe Although played more aggressively than in their opening match according to ESPNcricinfo's ball-by-ball data, 27.5% of their shots were attacking in this innings compared with 20.83% in their previous game, against South Africa -

(one in this innings, three on nine overs collectively. Monday), and scored lesser against South Africa.

Zimbabwe's stand of 37, which could not stand up to New Zealand's two half-century stands. After the loss of Tim

and Ravindra put on 59 off 44 balls before Conway and Daryl Mitchell combined for 58 off 32 deliveries to

# NHA reports record Rs 50 bln revenue surge

**ISLAMABAD** Minister Communications

Abdul Aleem Khan informed the Senate on Friday that the National Highway Authority (NHA) achieved a historic increase of Rs 50 billion in revenues during the 2024–25 fiscal year, with earnings climbing from Rs 64 billion Rs 110 billion—a remarkable 100% rise.

During the Question Hour, the minister also updated senators on progress regarding the Lowari Tunnel's access roads. He stated that the 33.2 km network is split into two phases. The first phase, covering 18.6 km, was completed in 2010 and has been serving traffic since. The second phase, stretching 14.6 km, saw its southern segment finished in December 2020, while progress on the northern section stalled at 61.6% due to a legal battle between

### PA speaker to drop reference against 26 Opp MPAs

LAHORE: A significant breakthrough has been reached between the government and opposition in Punjab Assembly over the suspension of 26 MPAs.

According to sources, Punjab Assembly Speaker Malik Ahmad Khan has decided to drop the disqualification reference filed against the opposition members in the Election Commission of Pakistan. The assembly secretariat has prepared a draft to suspend the reference moved in the ECP, the sources

The final draft to withdraw the reference would be issued after formal approval from the speaker, who is currently on a foreign tour. According to sources, the ruling party lawmakers had earlier submitted applications to the speaker seeking disqualification reference against 26 opposition members.

The applications were Chaudhry moved Ahmad Iqbal, Mian Mujtaba Shujaur Rehman and Iftikhar Chachar. Sources confirmed that the matter of reinstating the opposition would be suspended members addressed once the speaker returns from his foreign

trip.
Moreover, the opposition has announced a boycott of the Punjab Assembly sessions until their suspended members are reinstated. Earlier, the Punjab Assembly had witnessed a political standoff after 26 opposition members were suspended due to disorderly conduct. In an effort to restore parliamentary order and resolve the issue, a negotiation committee—comprising members from both the government and opposition—was

### Pak's current account surplus records \$2.1b F.P. Report

ISLAMABAD: Pakistan's current account surplus has recorded \$2.1 billion in the fiscal year 2024–25 (FY25). reaching the highest level in 22 years and the first open ing surplus in 14 years.

Prime Minister Shehbaz

Shehbaz Sharif mentioned that Pakistan's current account surplus was mainly supported by a considerable escalation in remittances from overseas Pakistanis, which rose by over 25% helping FY25 economic progress rise. A good year-on-year increase of 8% was also seen in exports in June 2025, supporting the surplus directed alongside imports and improved foreign exchange reserves, which now exceed

'This surplus is evidence of our promise to economic stability," PM Shehbaz Sharif said. "The government is aggressively working to improve the business and investment framework and our financial indicators show that the economy is on a steady path.

ally emphasised that the FY25 economic progress determines the success of focused policy interventions, including high interest rates, import restrictions. and incentives for export-

# AI will bring change in military affairs: CASS

F.P. Report

LAHORE: The Centre for Aerospace and Security Studies (CASS), Lahore, hosted a seminar titled 'Artificial Intelligence, Electronic Warfare & Cyber Warfare, Unmanned Aerial Systems: A New Paradigm of Next-Generation Aerial War".

The event was widely attended by academics, students, intellectuals, and domain experts. In his tions. introductory remarks, Air Commodore (Retd) Dr Naveed Khaliq Ansaree, Director - CASS Lahore, noted that advancements in emerging technologies mark a seismic shift in the

character of warfare. Their impact, stressed, is critical to the future operational readiness and strategic posture of the Pakistan Äir Force. Prof Dr Yasser Ayaz, Chairman of the National Centre of Artificial Intelligence (NCAI), while delivering the keynote address, stated that Artificial Intelligence (AI) will bring a transformational change and represents the biggest revolution in military affairs since the advent of gunpowder and nuclear weapons.

He added that air forces have the greatest scope for AI application, particularly in refining the OODA loop and enhancing command centres. Citing the United States' Joint All-Domain emphasised the need for fied, approach to AI. Group Captain Farhan Ahmed, expert on Cyber operations, noted that warfare has sus-platform to systems-

PESHAWAR: The Peshawar High Court (PHC) has issued a notice to the Election Commission of Pakistan (ECP) and other

relevant parties in a petition filed by Pakistan Tehreek-e-Insaf (PTI), seeking to declare the party a political party. The court has sought a response from the ECP and other parties till 21st July, on

PHC two-member bench comprising of Justice hours alone due to rain-Sahibzada Asadullah and Justice Farah Jamshed heard eight the petition filed by Chief Additionally, fifty-three Pakhtunkhwa, Shah Faisal ongoing monsoon season emergency. Utman Khel, and Bashir Wazir, counsel for the petitioner, appeared before the

The petitioner's counsel argued that PTI is a political party that holds a majority in the Khyber Pakhtunkhwa Provincial Assembly However, the ECP has excluded PTI from the definition of a political party. The counsel pointed out that the Election Rules 2017 contradict the Election Act 2017, which does not require a political party to have an electoral symbol.

The petitioner's counsel argued that the ECP's decision to declare PTI candidates as independents is unlawful. According to the Election Act 2017, PTI is a political party, and a 13member bench of the Supreme Court has also declared PTI a political party. The ECP does not have the authority to declare PTI candidates as independ-

petitioner requested the court to declare the ECP's action as unlawful and recognize PTI members of the assembly as members of the party. The petitioner has also sought to nullify the allocation of reserved seats, which were denied to PTI despite its majority. The petitioner has further requested the court to declare the ECP's orders as ultra vires. PHC issued notices to the ECP and other relevant parties after hearing initial arguments, and adjourned the hearing till 21st July.

Court seeks response on enlisting Shibli Faraz in PNIL: The Peshawar High Court (PHC) has issued a notice to the federal government and other authorities in a petition filed by PTI leader Senator Shibli Faraz, seeking removal of his name from the Provisional National Identification List (PNIL). The court has adjourned the hearing till 28th July, on Friday.

PHC divisional bench comprising Justice Sahibzada Asadullah and Justice Farah Jamshed heard the petition. The Advocate General of Khyber Pakhtunkhwa, Shah Faisal Utmankhel, and the petitioner's counsel, Bashir Khan Wazir, appeared before the

# Monsoon rains claim 193 lives across Pakistan

F.P. Report

ISLAMABAD: Authorities have released detailed figures on the damage caused by monsoon rains in Pakistan between June 26 ing. The scale of destruc- boats to ease movement and July 17, revealing a tion underscores the ongo- and support emergency tragic toll across multiple ing vulnerability of com- needs. provinces.

According to the report, as many as 15 people lost their lives in the past 24 related incidents, including children.

Khyber individuals has reached 193, with 544 people injured. Punjab has suffered the highest number of casualties, with 114 deaths and 437 injuries

reported so far. In Khyber Pakhtunkhwa, forty people have died and 57 have been injured. Sindh recorded 21 deaths and 40 injuries, while Balochistan has reported 16 fatalities and four injured. Azad Kashmir and Islamabad each reported one death due to heavy rains. The monsoon has also severely impacted property and livestock. In the last 24 hours, seventy-nine homes were damaged, and 67 livestock

animals drowned.

# Israel kills 35 in Gaza

GAZA: At least 35 queueing for water. Palestinians have been killed since dawn across Gaza in Israeli attacks, medical sources have told Al Jazeera, as the besieged and bombarded enclave's decimated health system, overwhelmed by a daily flow of wounded, is forcing doctors to make decisions on who to treat first.

In the latest killings on Friday, three people died in treat. an Israeli attack on the Tuffah neighbourhood of an Israeli air attack in Jabalia an-Nazla, in northern Gaza. Earlier, an Israeli attack hit tents sheltering displaced Palestinians in al-Mawasi, southern Gaza previously designated a socalled "safe zone" - igniting a major fire and killing at least five people, including infants. Al-Mawasi has come under repeated, deadly Israeli fire.

The death toll also includes includes 10 people who were desperately seeking aid. Al Jazeera's correspondent Hani Mahmoud said the injured, including children, were transferred to Nasser Hospital. Some showed wounds compatible with drone attacks. "Drone missiles are packed with nails, metals and shrapnel that explodes at high speed, causing internal bleeding," Mahmoud said. "These attacks are on the rise and

# Apex court overturns criticism of junior judge

Supreme Court on Friday invalidated critical observations made by Sindh High Court against an Anti-Terrorism Court (ATC) judge, underscoring the importance of a comprehensive inquiry and prudence before issuing critical pronouncements against lower court judges. The highest court affirmed that everyone makes errors, including judges, and malicious purpose must be substantiated before reaching such serious inferences.

A three-judge panel led by Justice Muhammad Ali Mazhar delivered a 12-page ruling. The tribunal maintained that severe judicial pronouncements, particularly when founded solely on spoken accusations, are inappropriate and can damage a judge"s standing and erode public trust in the judicial system.

The Supreme Court rejected the strong com-ments made by High Court process. udges about the junior

appellant's administrative role, as a replacement had already been selected.

The court emphasized that judicial pronouncements documented in rulings or disseminated in the public records, potentially impacting a judge's career. It directed that reciprocal respect and decorum must be maintained within the legal system and recommended that concerns or claims should be communicated through private reports to the Chief Justice of the respective High Court instead of public rebuke.

Justice Mazhar stated in the judgment that courts should guide and counsel junior judges instead of censuring them. Refusing the petitioner an opportunity to defend himself was a violation of Article 10-A of the Constitution, which guarantees the right to due

The matter began when officials.

judge but did not restore the Anti-Terrorism (ATC) Karachi Judge Zakir Hussain appealed to the Supreme Court against the Sindh High Court"s decision and observations. The High Court had earlier annulled two of his press become permanent orders—one concerning judicial custody instead of police custody for a defendant, and the other regarding the establishment of a Joint Investigation Team (JIT). The High Court also questioned the presence of the defendant's parent in the judge's office, seeing it as indication of bad faith.

Consequently, the High Court suggested the revocation of administrative authority from Judge Zakir Hussain. Contesting these measures, the lodged a request with the Supreme Court, which has now found in his favor by setting aside the reprimands, strengthening the tenet of fairness, and promoting circumspection in the handling of judicial

### **UK** police hunt suspects after anti-migrant protests turn violent

EPPING, UK (AFP): Police unrest, which promised Friday to track down suspects behind violence at a protest outside a southeast England hotel believed to house asylum seekers, after officers and vehicles were attacked.
