Consensus Reached on Amendments to National Commission for Minorities

ISLAMABAD: A consensus-based amendment to the National Commission for Minorities Rights Bill, 2025 has been finalised in a recent meeting at Aiwan-e-

F.P. Report

The amended Bill has been forwarded to the Parliament for reconsideration in its Joint Session. These amendments were prepared in response to the President's earlier message to the Parliament under Article 75(1) of the Constitution of Pakistan.

The Bill seeks to establish a statutory commission to safeguard the rights of religious minorities, ensuring their representation and ion. The commission will monitor implementation of minority rights, review relevant policies, and will have the powers to investigate rights violations, independently.

This legislation reflects a significant step toward fulfilling constitutional guarantees and international commitments to minority rights in Pakistan. The formation of the commission includes representatives from all provinces and minority communities, promoting inclusivity and effective oversight.

The Bill will proceed under the constitutional process for due consideration by the Parliament in its joint session.

Indonesian president says MPs' perks to

JAKARTA Indonesian Prabowo Subianto says political parties have agreed to revoke a number of perks and privileges for parliamentarians in a major concession to people taking part in antigovernment protests that have killed at least five people.

Protests over what the demonstrators have criticised as excessive pay and housing allowances for par-liamentarians started on Monday and expanded into riots on Thursday after one person, a motorcycle in a police action at a protest site.

Rioters ransacked or set ablaze the homes of some members of the political parties as well as some state installations as protests rocked major cities in Southeast Asia's biggest economy

"Leaders in parliament have conveyed that they will revoke a number of parliament policies, including the size of allowances for members of parliament and a moratorium on over-seas work trips," Prabowo said at a news conference at the Presidential Palace while flanked by the leaders of various political par-

CAIRO/JERUSALEM (Aljazeera): (Reuters): Israeli forces President pounded the suburbs of Gaza City overnight from the air and ground, destroying homes and driving more families out of the area as Prime Minister Benjamin Netanyahu's security cabinet was set on Sunday to discuss a plan to seize the city.

Local health authorities said Israeli gunfire and strikes killed at least 18 people on Sunday, including 13 who tried to get food from near an aid site in the central Gaza Strip, and at least two in a house in rideshare driver, was killed Gaza City. The Israeli military spokesperson's office said they were reviewing the reports.

Residents of Sheikh Radwan, one of the largest neighborhoods of Gaza City, said the territory had been under Israeli tank shelling and airstrikes throughout Saturday and on Sunday, forcing families to seek shelter in the western parts of the city.

The Israeli military has gradually escalated its operations around Gaza City over the past three weeks, and on Friday it ended temporary pauses in the area that had allowed for aid deliveries, designating it a "dangerous combat

Gaza City suburbs "They are crawling into Around half of the heart of the city where hundreds of thousands are sheltering, from the east, north, and south, while bombing those areas from the air and ground to scare people to leave," said Rezik Salah, a father of two, from Sheikh Radwan.

An Israeli official said Netanyahu's security cabinet will convene on Sunday evening to discuss the next stages of the planned offensive to seize Gaza City, which he has described as Hamas' last bastion.

A full-scale offensive is not expected to start for weeks. Israel says it wants to evacuate the civilian population before moving more ground forces in. On Saturday, Red Cross head Mirjana Spoljaric said an evacuation from the city would provoke a massive population displacement that no other area in the Gaza Strip is equipped to absorb, amid severe shortages of food, shelter, and medical supplies.

"People who have relatives in the south left to paign in Gaza has killed stay with them. Others more than 63,000 people, including myself didn't mostly civilians, according find a space as Deir Al-Balah and Mawasi are and it has plunged the overcrowded," said Ghada, enclave into a humanitaria mother of five from the an crisis and left much of it city's Sabra neighborhood. in ruins.

enclave's more than 2 million people are presently in Gaza City. Several thousand were estimated to have left the city for central and southern areas of the enclave, according to local sources.

Israel's military has warned its political leaders that the offensive is endangering hostages still being held by Hamas in Gaza. Protests in Israel calling for an end to the war and the release of the hostages have intensified in the past few weeks.

Large crowds demonstrated in Tel Aviv on Saturday evening, and hostages' families protested outside the homes of ministers on Sunday morning. The war began with a Hamas-led attack on southern Israel on October 7, 2023, in which around 1,200 people were killed, mostly civilians, and 251 taken hostage. Twenty of the remaining 48 hostages are believed to still be alive.

Israel's military camto Gaza health officials,

Pattoki AC dies due to hear failure

LAHORE (APP): Assistant Commissioner Pattoki Furqan Muhammad Khan lost his life due to a ruptured cerebral artery while actively engaged in flood relief operations.

Farhan Ahmad, an official posted at Balloki Barrage, confirmed that the AC had been stationed at the Head Balloki Rest House and had been continuously supervising relief efforts in flood-affected areas for the past four days.

He suddenly collapsed on Sunday, and although immediate medical assistance was provided, he could not be revived. Pattoki is a tehsil of Kasur district, one of the regions hit hard by the ongoing floods.

Capacity building key to combating malnutrition

LAHORE (APP): Director General BISP Punjab Muhammad Nasir Khalily has said that through Nutrition Stabilization should receive the care and Local

BISP spokesperson said on Sunday, the BISP DG expressed these views while addressing a training workshop organized in collaboration with the World Health Organization (WHO) and the Punjab Healthcare Department. The five-day programme focused on the Inpatient Management of Severe Acute Malnutrition.

Highlighting the Benazir Initiative, Nashonuma Khalily said it reflects the government's commitment to improving the health and nutrition of mothers and children across Punjab.

He stressed that malnutrition not only hampers children's growth but also restricts their future opportunities, adding that BISP, with WHO's support, will continue working to build a healthier and stronger generation.

The opening ceremony was attended by senior officials of BISP Punjab, the Specialized Healthcare Department, and Mayo Hospital Lahore while closing session, graced by the Health Punjab. Healthcare providers from 11 NSCs across Lahore, Kasur, and Sheikhupura joined the training.

From ashes to order: Pakistan Army's triumph in rebuilding Kurram

Nabeeha Fajar Javed

ROM ashes to revival, when chaos engulfed Kurram and years of PTI's failed governance stood exposed, it was the Pakistan Army that turned despair into determination, rebuilding not just a bazaar, but the soul of

On November 21, 2024, Kurram district was plunged into chaos when a civilian convoy en route to Parachinar was brutally attacked, causing devastating human and material losses. The tragic event triggered public outrage, culminating in the torching of Bagan Bazaar, once a vital hub of commerce and community

The destruction went beyond physical infrastructure. It reflected the deeper, long-festering wounds of neglect, insecurity, and administrative failure. For over 13 years, under PTI's governance, the region suffered from poor service delivery, hollow promises of development, and an alarming lack of crisis management Therefore, in moments when strong political leadership was most needed, the

civilian administration remained absent, fragmented, or ineffective. What happened in Kurram was not an isolated breakdown it was the inevitable result of over a decade of governance decay. But where the civilian leadership faltered, the Pakistan Army stepped in, not

just to restore order but to rebuild confidence. In the immediate aftermath of the attack, the Army led with swift damage assessments, closely coordinated with local elders and the district administration, and rolled out a comprehensive, multiphase reconstruction plan.

Their response was not reactive; it was strategic, people-centered, and executed with military precision.

This marked the beginning of a transformative chapter. The Army's approach went beyond security operations, it focused on winning hearts and minds by deliv-

On May 16, 2025, the rehabilitation of Bagan Bazaar officially began. In just two months, the progress was nothing short of remarkable. 102 shops were reconstructed. The National Bank, NADRA office, waiting areas, schools, and madrassas were rebuilt, roads were repaired, and street lights were installed. By July 22, 2025, a burned-down bazaar was not just standing again, it was thriving.

This reconstruction was more than physical, it was psychological. The presence of the Pakistan Army brought order where there was confusion, and hope where there had been despair. The community felt heard, supported, and safe something it hadn't experienced in over a decade under civilian governance.

As Sun Tzu wrote in The Art of War, "In the midst of chaos, there is also opportunity." The Army recognized that this moment of crisis was not just a threat, but a chance to rebuild not only infrastructure but win the people's hearts. And in doing so, they transformed a burned-out bazaar into a symbol of national resilience and restored dignity.

Today, the reconstruction of Bagan Bazaar stands as both a success story and a warning. It is a testament to what disciplined, compassionate leadership can achieve and a reminder of what neglect and political complacency can destroy. If the goal is to build a stronger, safer Pakistan, then responsibility must be matched with action, something the Pakistan Army has demonstrated, and the civilian leadership has long neglected.

Bilal Khattak:Peshawar's artist shines in the UK

F.P Report

PESHAWAR: Khattak, a multi-talented artist from Peshawar, has earned a prominent place in United Kingdom through his artistic skills. With contributions in music, media, and technology, Bilal has introduced a unique identity by blending traditional Pashto music with modern tunes.

Bilal began his career with Khyber TV, wheFre he rose to fame through programs like Zamung Khwakha and Khyber Beats Fusion. Apart from being a singer, music producer, videographer, edi-

tor, and TV host, he also

stands out for integrating Artificial Intelligence (AI) into his creative projects—a rare skill in modern media production.

He earned his Master's degree in Audio Production from the Film University of Westminster, London. It is believed that he is the first individual from Khyber Pakhtunkhwa-and possibly from Pakistan—to achieve such an international qualification in this field. His success is seen as a milestone for aspiring artists and media professionals in the

Fellow artists have praised Bilal Khattak's skills, call- nology.

region.

ing him a "cultural ambassador." According to his contemporary, the renowned singer and graphics designer Akbar Ali Khan, Bilal has proven through his hard work and vision that local music can be presented on a global scale. Other artists have described him as a "beacon of light" for the younger generation, saying his success is a true symbol of dedication and innovation.

Currently based in the UK, Bilal Khattak is working on various music and media projects that beautifully merge art, culture, and tech-

Khyber Governor Pakhtunkhwa Faisa Karim Kundi on Sunday visited the residence of Pakistan Peoples Party (PPP) leader Gohar Inqilabi in Swabi and offered fateha on the demise of his brother. He prayed for the departed soul and conveyed his heartfelt sympathies to the bereaved family. Later, the Governor visited Razar tehsil where he met the family of late PPP activist Mir Wali Khan. He offered condolences to the deceased's son and relatives and prayed for the elevation of the departed soul Speaking on the occasion, Governor Kundi said that Mir Wali Khan was a true PPP loyalist whose sacrifices and unwavering commitment to the party would always be remembered. He added that his lifelong devotion and struggle would remain a guiding light for other workers.

Three newborns die

WAZIRABAD (INP): Three newborns died as timely medical aid could not be provided to their mother in flood-affected Wazirabad. Life Wazirabad has been severely disrupted due to the floods, with roads submerged in water, causing major transportadifficulties. According to rescue officials, the three newborns two daughters and one son — passed away because the mother could not receive medical assistance on time due to the floodwater. The affected mother stated that the local hospital was surrounded by floodwater, and if medical aid had arrived promptly, her children could have been

Seerat-un-Nabi **Conference (PBUH)** held in Kohat

F.P. Report

KOHAT: A grand Seerat-(PBUH) Conference was held at the District Council Hall KDA Kohat under the chairmanship of the Commissioner Kohat Division, Syed Motasim Billah Shah, as part of the Khyber Government's Rahmatul-lil-Aalameen (PBUH)" Celebrations.

Deputy Commissioner Rahimullah Mehsud, Pir Habibullah Shah of Ghamkol Sharif, Additional Deputy Commissioner (G) Hamid Iqbal, assistant commissioners, District Khatib Mufti Shafiullah, officials of the Education department, students from public and private institutions and seminaries, religious scholars, ulema and other dignitaries attended the event in large numbers. Qirat and Naat competitions were held among the students, with prizes distributed to those who performed exceptionally.

Speakers highlighted that the Holy Prophet Muhammad (PBUH) came as a mercy for all mankind and that his life exemplifies brotherhood, equality, justice, prosperity and peace. They stressed the need to acquaint the younger generation with the Holy Prophet's (PBUH) teachings through more such

annual World The Conference Protection of the Finality of the Prophethood was held in Lawagar Park under the auspices of Maulana Abdul Raziq, the president of the conference. In which thousands of children of Islam, including distinguished scholars and speakers from all over Pakhtunkhwa, participated. Among the distinguished guests were Mufti Fazal Ghafoor, Qari Ikram-ul-Haq, Muhammad Arshad Madani, Maulana Hafiz Ibn-e-Amin, Mufti Ajmal Khan, Abdul Raziq, and a large number of

scholars. The venue built for the participants in Lawagar Park was insufficient because students, the general public, and people of all schools of thought participated from all over Karak, which reduced the limited space in Lawagar Park and the children of Islam sat in the scorching sun listening to the speeches of their distinguished scholars, which was an enviable sight.

Polio immunization drive from today

Lasbela, and Ziarat.

Operations Emergency Center (EOC) Balochistan on Sunday has announced the launch of a week-long immunization campaign beginning September 1 (Monday).

The week-long initiative aims to vaccinate more than 2.179 million children against polio under the age of five across 26 districts of the province.

EOC Coordinator Inamul-Haq described the campaign as a vital step in the ongoing fight against the poliovirus, which is still present in the environmental samples of the province.

The campaign will span the districts including Quetta, Pishin, Killa Abdullah, Chaman, Barkhan, Dera Bugti, Hub, Jaffarabad, Jhal Magsi, Kalat, Khuzdar, Killa Loralai, Saifullah, Mastung, Nushki, Naseerabad, Sherani, Sibi, Sohbatpur,

India committed to improving ties with China, Modi tells Xi

Narendra Modi said New Delhi was committed to improving ties with China in a key meeting with President Xi Jinping on Sunday, as both leaders discussed the need to expand trade and investment ties against the backdrop of U.S. tariffs.

Modi is in China for the first time in seven years to attend a two-day meeting of the Shanghai Cooperation Organisation, along with Russian President Vladimir Putin and other leaders from Central, South and Southeast Asia and the Middle East,

The meeting comes days after Washington imposed 50% tariffs on Indian goods in response to New move analysts say has pushed Modi and Xi to align against Western pres-

sued strategic autonomy, and their ties should not be seen through the

Modi said India and China pur-

leaders also discussed expanding common ground on bilat-

eral, regional, and global issues, and challenges like terrorism and fair trade in multilateral platforms, the Indian statement said.

(Reuters) - Indian Prime Minister a video posted on his official X

At a reception for the summit Xi told leaders that the SCO now bears "greater responsibilities" for safeguarding regional peace and stability, and for boosting development of various countries, Chinese state news agency Xinhua reported on Sunday.

Modi said an atmosphere of peace and stability" has been created on their disputed Himalayan border, the site of a prolonged military standoff after deadly troop clashes in 2020, which froze most areas of in a show of Global South solidarity. cooperation between the nucleararmed strategic rivals.

He added that an agreement had been reached between both nations Delhi's purchase of Russian oil, a regarding border management, without giving details. The neighbours share a 3,800 km (2,400 miles) border that is poorly demarcated and has been disputed since the 1950s.

'We must ... not let the border issue define the overall China-India lens of a third country, according to an Indian foreign ministry readout of the meeting.

relationship," Xinhua reported Xi as saying. China-India ties could be "stable and far-reaching" if both Modi emphasised reducing India's sides focused on viewing each other trade deficit with China and expand- as partners instead of rivals, Xi ing cooperation on regional and added. Both leaders had a breakglobal issues, including terrorism through meeting in Russia last year and fair trade practices, the ministry after reaching a border patrol agreement, setting off a tentative thaw in ties that has accelerated in recent weeks as New Delhi seeks to hedge against renewed tariff threats from Washington.

Direct flights between both nations, which have been suspended We are committed to progressing since 2020, are being resumed, Modi our relations based on mutual added, without providing a time-respect, trust and sensitivities," Modi frame. China had agreed to lift export

China opposes Washington's steep tariffs on India and will "firmly stand with India," Chinese Ambassador to India Xu Feihong said this month.

decades, painstakingly cultivated ties with New Delhi in the hope that it would act as a regional counterweight to

In recent months, China has allowed Indian pilgrims to visit Hindu and Buddhist sites in Tibet, and both countries have lifted reciprocal tourist visa restrictions.

"Both India and China are engaged in what is likely to be a lengthy and fraught process of defining a new equilibrium in the relationship," said Manoj Kewalramani, a Sino-Indian relations expert at the Takshashila Institution think tank in Bengaluru.

However, other long-term irritants remain in the relationship.

China is India's largest bilateral trade partner, but the long-running trade deficit - a persistent source of frustration for Indian officials reached a record \$99.2 billion this year. Meanwhile, a planned Chinese mega-dam in Tibet has sparked fears of mass water diversion that could reduce water flows on the major Brahmaputra River by up to 85% in the dry season, according to Indian government estimates.

India also hosts the Dalai Lama, the exiled Tibetan Buddhist spiritual leader whom Beijing views as a dangerous separatist influence. India's arch-rival Pakistan also benefits from staunch Chinese economic, diplotold Xi during the meeting on the curbs on rare earths, fertilisers and matic and military support.

2015 or how they faired. But by 2024, roughly half of the 100 additional arrivals that year were still living in Altena, Wesemann said. Most of the rest had moved to bigger cities, while a few Iraqis decided to return home, she said.

Among those who stayed is Humam al-Gburi, a 34-year-old Iraqi refugee who arrived by bus in October 2015. He said he had no idea what to expect, but the warm welcome eased his fears.

Lasting bonds were forged through the town's integration program. A translator introduced him to Ursula Panke, an 85-yearold retired nurse he refers to as his "omi", or grandmother.

Their friendship began when Gburi helped her set up an art exhibition. "He hung everything so precisely, so carefully," recalled, smiling.

She became a mentor, encouraging him to try different vocational courses until he found his calling. He now works as a nurse himself at a nearby orthopaedics and trauma

clinic.

"In a big city, you're just a number. Here, people know me. Uschi is my family," Gburi said, using Panke's nickname. "Family doesn't mean blood — it's the people who listen, who help, who stand by you."

Global economic crisis & climate change

iamond-rich Botswana in Africa has run out of medical supplies in its public health system. President Diko Buma has declared a national emergency. The public health systems owe private suppliers \$17.5 million, and it has no money to pay.

The reason for the dire straits is that the US aid for its HIV programme, which is one-third of its national health budget, has been stopped by the Trump Administration as part of its ruthless pruning of public expenditure.

At the other end of the Atlantic Ocean, in oil-producing Venezuela in South America, Venezuelans are facing severe food shortages. Families are unable to buy proteinrich food for the children. They are not even able to buy the bare necessities to keep food on the table. Schools have asked parents not to send children to school if they had not had proper food.

Apart from growing malnutrition, children who have not had a proper meal are developing headaches. There are times when children go off to bed early to escape the pangs of hunger. The prices have gone up, and the American restrictions are affecting the economy.

The slowing global economy and its bleak consequences are showing up in different forms, affecting the daily lives of the people across the countries as can be seen from the examples of Botswana and Venezuela.

Meanwhile, South Africa, which will be hosting the 2025 G20 summit in November, has appointed a commission of experts headed by Nobel Economics Prize winner Joseph Stiglitz and comprising other experts to prepare a report on global inequalities. The report is to be ready by November when leaders of G20 countries meet in November.

South African President Cyril Army's logistical capabilities allowed for the smooth people "see the impacts of rising food and energy prices, of debt, of trade wars, all driving this growing gap between the rich and the rest of the world, underlining progress and economic dynamism. A new oligarchy in our global economy is becom-

ing apparent." The world is facing an economic crisis, but it is something that neither advanced economies nor the emerging economies are willing to admit. It seems that an admission that there is an economic crisis would mean an acceptance that the market economy, which has been the reigning ideology for more than four decades, is crumbling. Even the richest economy like the United States is in a panic mode, and President Donald Trump's feverish tariff measures are a symptom of economic uncertainty. As no one wants to recognize the problem, it is evident that experts and leaders are flailing hands in their bid to find a way out of the economic impasse.

What is needed is for the experts and heads of countries of the world to come together and look for a solution. Intertwined with the economic and unequal wealth crisis is the deteriorating climate issues. The unusually intensive monsoon in India, Pakistan and Nepal has killed more people than ever, and the economic damage it has caused runs into billions of dollars.

There is a connection between economic stability and curbing greenhouse gas emissions. It is the rising global temperatures that is the cause behind the monsoon havoc. It becomes necessary to take mitigatory action with regard to climate change. and the investments in clean energy economies could help revive the stalled growth rates. A green economy is one way of ensuring equitable growth, which will keep the health of the planet as well as that of societies in good shape. But it needs courage and resolve to pursue a new economic path which protects natural resources and helps people to lead healthy and productive lives.

management is lacking.
The sincerity of the Pakistan Army in disaster operations lies not just in their operational efficiency but in their empathetic and people-centered approach. Unlike contractors or outsourced responders, the Army personnel deployed during such operations do not treat this as a job-they treat it as a moral obligation. Repeatedly, pictures and videos have appeared showing soldiers carrying elderly people on their backs, comforting crying children, distributing food with their own hands, and sharing tents with displaced families. This connection with the people, built through decades of service during natural calamities, has created an unmatched level of trust between the Army and the citizens of Pakistan. The 2025 floods are no exception. Across the length and breadth of the country, civilians have welcomed Army units with open arms and have expressed deep gratitude for their presence. Social media is inundated with videos and posts praising the efforts of the soldiers, and social unrest, which and countless eyewitnesses often afflict disaster-hit have testified to the selflessness and professionalism of the Army's disaster and community engage-

severely impacted by the

Ehud Olmert did indeed speak very frankly

Speaking" series of interviews lived up to its Israelis, and for the wider name and reputation when region, to hear this from a interviewer Katie Jensen took on former Israeli Prime Minister Ehud Olmert, never an easy interviewee but always good trum or in the peace camp, value in terms of straight but one who represented talking.

brate his 80th birthday next month, has in recent years taken on the mantle of the responsible adult of Israeli politics, a kind of a sage at existential dangers emanating from Benjamin Netanyahu's long and unbearable tenure as prime minister — even more so since the latter has partnered in power with the most extreme right-wing messianic elements in Israeli politics.

Olmert is challenging to interview but never boring ership. or short of novel ideas, partly because of his own personal and political jour-ney, which lends much weight to what he says, but partly because he is ready to deliver certain home truths that few others in Israeli politics are willing to articulate with the same courage

This is especially important in these dark days for Olmert make Israel's politics and society. His political career has ranged from the heights of serving in government and ascending to the prime minister's office, as well as the from that office after he was indicted for corruption and given a custodial sen-

tic thorny and tenacious exterior of this "sabra" (a term for a Jewish person born in Israel that is derived from the word for a prickly pear cactus, which is tough on the outside and soft on the inside) there also lies a thoughtful and courageous leader. This is not only new frontiers.

This is something that has been especially significant in his relentless quest with peace the Palestinians, and his constant search for new partners on both the Israeli and the Palestinian sides, most recently his collaboration with Nasser Al-Kidwa, the former Palestinian foreign minister and head of the Palestinian delegation to

What Arab News managed, very skillfully, to extract from the interview went beyond consideration of Olmert's views on the current situation and how to resolve it, to also explore the very limits of discourse in Israel, even for one of Netanyahu government's harshest critics.

Firstly, when it was put to him that he supported the idea that Israel's prime minister should be tried in The Hague for war crimes, he was quick to protest that he would prefer to see Netanyahu stand in front of judges in Israel to answer for his alleged war crimes against the people of Israel, as justice should be done at The second limitation

touched on the most sensitive war-related issue for most Israelis: whether or not Israel's actions in Gaza constitute genocide. Olmert pushed the envelope of the discussion as far as possible in stating, very clearly, that war crimes were being committed in Gaza, but he knew that the very mention of the word genocide might completely discredit him and distract from the need to end the war and embark on peace building. However, the former prime minister was unequivocal in his declaration that he could not "tolerate it and forgive it (the war crimes) because care for the lives of the Palestinians as for any other human beings.'

Considering immeasurable suffering that has been inflicted by the Israeli military on the people of Gaza, this expression of empathy seems both obvious and natural, but it has not been

The latest episode of the view of many Israelis Arab News' "Frankly since the Oct. 7 attacks. It is, therefore, important for former prime minister, and in particular one whose political roots lie not to the left of the political specllking. the Likud party in the Olmert, who will cele-Knesset for 27 years and was in government for much of that time.

In his transformation, he has moved on from the idea of a "Greater Israel," of the gate warning against the building settlements on existential dangers emanat- occupied Palestinian land, first by supporting disen-gagement from Gaza and then, during his premiership, presenting Palestinian President Mahmoud Abbas with the most far-reaching peace plan offered by any Israeli leader, which unfortunately was never accepted by the Palestinian lead-

That episode has to this day left Olmert harboring a deep sense of missed opportunity — but not of despair, as much of his efforts now are focused on resurrecting that peace plan, albeit in much more difficult circumstances but at a time when the need for it is also more urgent and

Olmert makes a convincing case for ending the era of the present Israeli government, bringing down the curtain on Netanyahu's extremely harmful time in office and, with that, hoperock bottom of resigning fully ridding Israeli politics of Kahanist-racist-messianism. Yet there is also a certain historical irony in the bitter rivalry Beyond the characteris-Olmert and Netanyahu, and the reversal of their roles, that underlines their differ-

ing personalities. Netanyahu, in his opportunism, can take any side of any argument as long as it serves him personally and politically. He first did this when he demanded that Olmert, while prime minisbecause when in power he ter, take responsibility for was prepared to change the failures of the 2006 whenever he Lebanon War and resign. deemed it necessary, even Speaking from the if it meant upsetting his electoral base, but also customary pompous manbecause with Olmert there ner, he declared that is always a learning curve Olmert's decision not to and a readiness to explore resign "was like the captain of the Titanic, had he lived, being given another ship. Today, leaving Netanyahu at the helm after the colossal failures of Oct. 7 is akin to handing him an entire fleet of ships.

Olmert did not resign in 2006, but when he was investigated for corruption it was the self-righteous Netanyahu who, in 2008, said that "a prime minister who is neck-deep in investigations has no public or moral mandate to make crucial decisions ... right thing to do is for the government to go home. Olmert did indeed resign when he was indicted: Netanyahu still does not believe that his own moralistic stance applies to him, and neither does he have the ability to learn from his mistakes and change

Leaving aside the personal bitterness between these two leaders, it was important that Arab News' interview gave Olmert a platform on which to speak directly to the people of the region and send the message that what stands between ending the war, and Israel leaving Gaza and potentially embarking on a genuine peace process, is a general election.

He presented an alternative course of action to the brutal and heartless actions of the Netanyahu government against the people of Gaza when he suggested that the international community should be closely involved — with particular emphasis on regional powers — as partners, firstly in mitigating the humanitarian disaster in Gaza, and subsequently by assisting with security in the territothe resumption of Palestinian governance without any involvement by Hamas, and then the unification of Gaza and the West Bank

What stood out most of all in this interview was Olmert's eternal optimism and his conviction that with vision, determination, leadership, consistency. and perseverance, future for Israelis and Palestinians alike could be so much better than their

The rebellion of my daughter in besieged Gaza

few days ago, my 30-year-old daugh-Lter Yasmin, who has special needs, walked up to me in our little place at the school shelter. Her steps were gentle, but determined. And I could see her eyes glittering with joy. I thin mattress in crammed listened intently as she was struggling to speak.

Dad..., I ate...chocolate!" she said triumphantly. shelter has been an exhaust-My mind started to race, trying to work out what I had heard. Where did Yasmin get chocolate?

For many years, Yasmin has lived in a world that has its own rhythm, its own language of affection and Unfortunately, when she was just four months old, a severe fever left her with a developmental disability. And at the age of seven, she suffered chronic bronchitis and underwent lung surgery in Egypt, which further affected her health and develop-

We tried to provide a comfortable life for Yasmin as much as we could. We equipped her room with a computer, a tablet, colouring books, and toys of all sorts - building blocks, teddies, balloons, and even a swing suspended from the ceiling.

We also consulted specialists who prescribed Yasmin special medication. organised various indoor and outdoor activities for her. Hide-and-seek was her favourite game, which gave her thrills of excitement.

Fortunately, for years, we were considerably able to manage Yasmin's condi-

The lack of nourishment has been a serious problem for all people in Gaza. Everyone I know has grown much thinner, with pale skin and an emaciated body. My wife and I have suffered from spells of dizziness. Yasmin has been especially vulnerable. She has lost a lot of weight, and her health has deteriorated. In July, nearly 12,000 Palestinian children under the age of five were officially

diagnosed as malnourished. On August 22, the UN-backed Integrated Food Security Phase Classification (IPC) reported that Gaza City is officially experiencing a "man-made famine" and that an immediate, at-scale response is needed. The report marked the first time famine was declared in the Middle East. According to the IPC, more than 500,000 people in the Gaza Strip, roughly a quarter of the population, are either close to or have already reached catastrophic levels of famine. Unless the situation on the ground changes quickly, that number is expected to rise to more than 640,000 by the end of September, while those in emergency-level food insecurity will likely rise to 1.14 million.

cils. And her medications

in the Gaza Strip, roughly a quarter of the population, are either close to or have already reached catastrophic levels of famine. Unless the situation on the ground changes quickly, that number is expected to rise to more than 640,000 by the end of September, while those in emergency-level food insecurity will likely rise to 1.14 million.

In addition to the casualties of the ongoing war more than 62,000 killed and 140,000 injured - more than 315 Palestinians have already died as a result of the forced starvation, half of them children.

At this critical time Yasmin surprisingly stood before me, carrying the lightness of a secret. With a glowing face, she declared she had eaten chocolate!

Startled, I turned to her. chocolate. Yasmin? Where? Who gave it to you?"

Sensing my confusion, she smiled and her face lit up with more delight. She gently shook her head and explained, "No, no, Dad. I...didn't eat...chocolate. said...I dreamed!"

I jumped up and gave Yasmin a big hug, bursting into laughter – laughter that was louder and longer than I had in months. My laughter, however, was laced with extreme sorrow and fatigue.

Amid the horrors of war and widespread famine, Yasmin had a dream of something sweet. And the dream was sweet enough make her highly delighted.

Yasmin, a young woman with special needs, was not aware of the political meaning of her dream. She didn't know that her dream, where she tasted something unreachable, was an act of rebellion against Israel's atrocities and defiant hope to live freely in peace and

Myanmar's election plan a facade

Dr. Azeem Ibrahim

for military rule

The ruling junta in Myanmar has annofree vote in 2020. The junta essence of choice. unced that the country will hold its first general election since the 2021 imprisoned its leaders and coup starting in December silenced its supporters. In election? Partly it is about engage with the junta. That 2025. At first glance, this its place, the generals have international image. Hafed Al-Ghwell The Sahel region of and the "coup-proofing" of attack, making it the deadregimes over any meaning-

Africa has undergone a dramatic transformation into the world's epicenter for extremist violence, responsible for 51 percent of global terrorism fatalities in 2024. Put simply, this translates to nearly 4,000 deaths in a single year, and nearly 20,000 since 2019. Such a rapid surge, from a mere 1 percent of terrorism-related deaths worldwide 18 years ago, is not an organic flareup of insurgency but the direct outcome of calculated maneuvering and the wholesale collapse of traditional security frameworks.

Firstly, the unraveling of the Sahel accelerated following the withdrawal of an increasingly unwelcome, yet persistent, French security presence and a much more muted UN stabilization mission. Together, these interventions fielded approximately 13,000 personnel and spent billions in the hopes of sta-

Into the inevitable vacuums created when the last French boots departed stepped enterprising, externally backed paramilitary forces, the deployment and goals of which aligned less counterinsurgency success than with mineral extractions and the cultivation of political influence.

oilizing this restless region.

Concurrently, Islamist factions — in particular Al-Qaeda affiliate Jama'at Nusrat Al-Islam Wal-Muslimin (or JNIM) and State Islamic Province, professionalized their operations, capitalizing on communal grievances, corrupt governance, and vast ungoverned spaces to entrench their control over rural territories and

sprawling illicit economies. The result? A self-perpetuating ecosystem of violence in which militant groups, foreign mercenares and national armies vie for dominance, effectively rendering the Sahel a laboratory for hybrid warfare and a woeful monument to the failure of conventional counterterrorism.

In hindsight, France's approach was rightly criticized for its operational limitations and perceived paternalism, its presence nonetheless maintained a tenuous degree of containment, securing key urban hubs and border zones. The void created by the French departure resulted in an actively contested pattlefield that was immediately weaponized extremist formations to execute brutal territorial campaigns expansion

buoyed by intercommunal

fractures. In the wake of this we have seen a security collapse of historic proportions. In Niger, for example, fatalities related to militant violence nearly doubled to 930 in 2024, while military casualties alone reached 499, the highest national toll among security forces worldwide. Burkina Faso experienced a relentless onslaught in which JNIM-attributed surged by more than 50

percent. Such escalations were the natural result of these groups exercising relative operational freedom following the erasure of the minimal, but critical, deterrence that had previously confined the conflict to rural peripheries.

Into this chaos stepped the Africa Corps, a rebranding of the infamous Wagner Group, the Russian statefunded private military group. It offered security partnerships to junta lead ers in exchange for mineral rights and a platform through which to challenge perceived Western overreach and hegemony. Now, Sahelian counterparts pri-

counterinsurgency efforts.

How Sahel became the

center of militant extremism

These deployments are strated by its ability to accompanied by sophisticated disinformation networks. In Burkina Faso, for example, eight distinct foreign-influenced campaigns have targeted more than 28 million social media users. Such operations have eroded any residual trust in Western-backed interventions, institutions and democratic norms, entrenching the type of chaos and despair that creates entry creates a level battlefield on points for non-state actors adept at exploiting gover- contest control over vast nance and security vacu-

Any security dividends that were promised have tions of these shifts are proven to be a mirage. In Mali, for instance, the Africa Corps contingent has dwindled to an estimated 1,000 personnel, a fraction of the international presence that preceded it. It has been routed in key engagements, such as an ambush in July last year that killed 84 foreign troops near the border with

Algeria. Across the region, far from being contained, militant extremist factions have expanded their control of territory to an estimated 950,000 sq. km, approxi-

tals such as Bamako.

The groups' brutal tactics have further militarized the environment. Malian and allied foreign forces have been responsible for 82 percent of all civilian fatalities in the past year; a perverse approach to counterterrorism that serves as a potent recruitment tool for the very groups they purport to fight. This is not a security partnership but a predatory enterprise that accelerates the disintegration of the region. The accelerating professionalization of militant violence in the Sahel represents a dangerous new phase in global insurgency, characterized by the external transfer of advanced tactical capabilities.

attacks increased.

The groups' brutal tac- eases. tics have further militarized have been responsible for in Mali, Burkina F 82 percent of all civilian fatalities in the past year; a perverse approach to counterterrorism that serves as a potent recruitment tool for the very groups they purport to fight. This is not a security partnership but a predatory enterprise that accelerates the disintegra-

tion of the region. Moreover, the acceleratmilitant violence in the Sahel represents a dangerous new phase in global insurgency, characterized by the external transfer of advanced tactical capabilities. This is not an organic

evolution but is facilitated by a form of Islamist "outsourcing" in which expertise in drone warfare, precision targeting, and complex logistics is brokered by external actors. instance, recent reports confirm that Al-Shabaab in Somalia, which generates an estimated \$200 million in annual revenue, has received military equipment and training from the Houthis in Yemen, including armed drones and ballistic missiles.

Such knowledge transthe evolution of dynamics in the Sahel that result in tangible effects on the battlefield. JNIM's lethality arrangements with rate, for example, has oritize resource extractions average of 10 fatalities per come.

frequency and audacity of have been destroyed, leadhave ing to surges in child mortality and preventable dis-

Furthermore, the politithe environment. Malian cal instability is now selfand allied foreign forces reinforcing; military juntas Niger have formed alliances to insulate themselves from any mechanisms for enforcement of accountability.

The response of the global community so far has been fragmented and ineffective. Western counterterrorism initiatives have prioritized military solutions over governance ing professionalization of reforms, neglecting root causes such as poverty, climate change, and ethnic marginalization. Regional partnerships such as the G5 Sahel have collapsed, while UN missions such as the Multidimensional Integrated Stabilization Mission in Mali have been forced to withdraw, resulting in further destabilization in areas previously under their protection.

The repeated tragedies in the Sahel are testament to the folly of treating militant extremism as a purely military challenge. As non-state actors proliferate and professionalize, and are measured by escalating violence spilling into neighboring regions, the world must recognize that without inclusive governance, susfers are only a small part of tainable economic development, targeted aid, and community-led security, the Sahel will remain a breeding ground for global terror and a harbinger of reached an unprecedented devastating conflicts to

New MoUs may boost bilateral trade: Malik

LAHORE (APP): SAARC Chamber of Commerce and Industry former President Iftikhar Ali Malik said on Sunday that in light of recent MoUs, the volume of Pakistan-Bangladesh trade could increase to \$5-7 billion annually within the next five years, up from the

current \$1.2 billion. In a statement, he highlighted renewed optimism that bilateral trade between the two South Asian economies would witness a significant surge in the coming years. He noted that the current trade volume of \$1.2 billion does not reflect the full potential of the two countries. With mutual cooperation, improved connectivity, and reduced trade barriers, the

trade volume could realistically reach \$5-7 billion annually within five years. He emphasized that new MoUs provide a framework to address key bottlenecks

such as banking channels, customs facilitation, and logistical hurdles. Enhanced people-to-people contacts, participation in trade fairs, and exchange of business delegations can further build confidence between the business communities of both countries. Promoting joint venture and investment opportunities in Special Economic Zones would also boost

industrial collaboration. He added that regional integration was another crucial factor. Reviving SAARC economic cooperation and placing renewed focus on intra-regional trade can create a win-win scenario not only for Pakistan and Bangladesh but for the entire South Asian region. By prioritizing economic diplomacy over political differences, both countries could ensure sustainable growth, generate employment, and reduce dependency on

extra-regional markets. Both countries benefit from geographical proximity, a shared cultural heritage, and similar consumer markets, which could serve as a strong foundation for expanding trade in sectors such as textiles, pharmaceuticals, information technology, leather goods, agricultural products, and light engineering. Pakistan can export high-quality cotton, yarn, surgical instruments, and agricultural machinery to Bangladesh, while Bangladesh could expand its market in Pakistan for garments, seafood, jute products, and home textiles, he concluded.

Solar energy set to transform power sector

Tax Ombudsman (FTO) Coordinator Saifur Rehman said on Sunday that growing demand for affordable electricity, combined with the high cost of imported fossil fuels, had made renewable energy a viable and sustainable alternative for Pakistan.

Talking to a delegation of industrialists led by Zia Ur Rehman, here, he highlighted solar power as the most promising renewable option, citing Pakistan's geographical advantage of abundant sunlight throughout the year. This resource could be harnessed to reduce reliance on costly thermal generation. He added that several factors were contributing to this positive trend, including government policies such as net metering, tax exemptions on solar panels, and renewable energy projects under the China-Pakistan Economic Corridor (CPEC), which encourage households and businesses Additionally, the falling global prices of solar technology had made it increasingly affordable.

He said that international financial institutions were supporting developing large-scale Saifur Rehman empha- solar parks and hybrid sized that growing aware- renewable projects. In brief

Zverev

knocked out NEW YORK (AFP): Third seed Alexander Zverev crashed out in the US Open third round on Saturday after losing to Canadian 25th seed Felix Auger-Aliassime in four sets. Zverev, the 2020 US Open runner-up, claimed the first set and had a set point in the second but unstuck as Auger-Aliassime won 4-6, 7-6 (9/7), 6-4, 6-4 in 3hr 48min. It is the first time Zverev has failed to reach the second week in New York since 2018. He suffered his earliest Grand Slam exit in six years at Wimbledon last month after losing in round one. Auger-Aliassime's best run at a major came when he reached the semi-finals at Flushing Meadows four years ago. "This feels good. I've been coming here since 2018. I'm still young, it's been a few years but I'm working my way," said the 25-yearold Auger-Aliassime, who beat a top-five player at a Grand Slam for the first time. "The tournament's going, the job's not done but this means a lot to me." Auger-Aliassime advances to a fourth-round meeting with Russian 15th seed Andrey Rublev on Monday.

Yamaguchi cruises

PARIS (AFP): Akane Yamaguchi beat former world number one Chen Yufei of China 21-9, 21-13 on Sunday to win the women's badminton singles world championship final. The Japanese seed rarely looked troubled on court in Paris and needed just 37 minutes to add a third world title to her gold medals from 2021 and 2022. "I felt the chance to win was very slim (before the tournament). Coming into it as the underdog, winning despite not having results this year, I nink that gives it different kind Yamaguchi said of her 2025 win. While she said she was "delighted" by the vic-Yamaguchi spared a thought for her injured opponent. "Chen Yufei got injured yesterday (Saturday), so it wasn't easy. I hadn't anticipated it, but I suppose this kind of score difference was inevitable given her condition." Chen, a Tokyo 2020 Olympic gold medallist, battled past top seed and reigning champion An Se-young of South Korea in a semi-final win marked by a nastylooking ankle twist early in the second game. The 27-year-old received treatment on the court Saturday and went immediately to have her ankle examined after the match. In Sunday's final, Chen appeared hampered in her movement and Yamaguchi took full advantage in the opening game. "I think there were moments she (Chen) couldn't react, so I did hit a bit more aggressively," admitted Yamaguchi. The fourth seed dug in stay Yamaguchi in the second game until the 28year-old pulled away after the interval to condemn Chen to a second world silver medal. "It's still quite swollen," Chen said of her ankle. "Since last night I've been undergoing treatment, icing it and so forth. Before

taking to the stage just

now (to receive her

medal), I'd already

taken eight painkillers.

"I believe it's about

respecting myself and

respecting my oppo-

nents. Though there

are (injury) issues, I

feel I can still walk

and stand on this court.

So I want to keep

fighting for it," added

Chen, who lost her

previous world final to

Yamaguchi in Tokyo

three years ago.

Norris retires as Piastri wins chaotic Dutch GP

(Agencies): Lando Norris retired from second place with an oil leak as McLaren team-mate Oscar Piastri took a controlled victory in an incidentstrewn Dutch Grand Prix.

The Australian's seventh victory in 13 races this season, in which he has been the model of coolness and consistency, extends his championship lead to 34 points. Norris lost second to Max Verstappen on the first lap, but pressured Piastri throughout after reclaiming the place a few laps later.

Piastri was always in control and Norris was on course for a comfortable second place only for his car to stop in a cloud of smoke with seven laps to go.

The dramatic turn of events at the end of a chaotic race featuring three safety cars and multiple crashes and incidents could be decisive in the private title fight between Piastri and Norris.

Red Bull's Verstappen inherited second place, and Norris' retirement elevated French rookie Isack Hadjar, 20, to an outstanding first career podium finish.

race full of drama were: A potentially decisive turning point in the title

A terrible race for Ferrari saw both drivers crash out at Turn Three

A series of controversial incidents and penalty deci-A huge blow for Norris

Norris sat on the dunes beside the seaside Zandvoort circuit, helmet on, with his head in his hands after climbing out of his stricken McLaren, as he digested the ramifications of his retirement.

The Briton had been poised for second place behind Piastri, who had controlled the race consummately from pole position throughout a series of incidents, including briefly threatening rain.

That in itself would have been a blow to Norris, who arrived in the Netherlands after winning three of the past four races. But his second retire-

ment of the year - following crashing out of the Canadian Grand Prix in June after hitting the back of his team-mate's car has dealt a body blow to his hopes. A 34-point lead is well

over one clear victory, and it will be hard work for Norris to claw back that lead on a man who has led the championship since the fifth race of the season in Saudi Arabia and is the model of solidity. Mercedes, which sup-

plies McLaren's engines, said they did not yet know whether the leak was on the car or engine side. McLaren team principal Andrea Stella said it was "unclear' what had caused the failure. Ferrari's day of darkness

Ferrari have struggled for competitiveness all weekend and Charles and Leclerc Lewis Hamilton were running fifth and seventh in the first part of the race, Leclerc trying in vain to challenge Hadjar and Hamilton pressuring his former Mercedes teammate George Russell.

Light rain began to fall after about 20 laps and on lap 23 Hamilton got off line through the banked Hugenholtzbocht hairpin.

Int'l cricketers return to Peshawar after 19 years

Cricket Stadium came alive Zalmi XI and Legends XI.

The event, jointly organments ensured a by the Khyber festive occasion. Stadium, formerly known as Peshawar Club Ground, is located in the heart of Peshawar, Pakhtunkhwa. renamed in honor of Arbab Niaz Muhammad, a former provincial minister who played a key role in promoting sports in the region.

The stadium was built in the 1980s and became one of Pakistan's recognized international cricket venues. It hosted first match in 1984 between Pakistan and India, while the first One Day International (ODI) was played in 1984 as well. Over the years, the ground has witnessed some historic ing matches featuring legends like Imran Khan, Javed Miandad, Wasim Akram, and Sachin Tendulkar.

With a seating capacity of around 20,000 spectators, it was once a bustling center for international cricket in the region.

However, due to security concerns and lack of renovations, international matches stopped being played there for nearly two decades. In recent years, the Pakistan Cricket Board (PCB) and the provincial government have worked on its renovation, expanding facilities and upgrading seating. The ground is now being revived with hopes of hosting Pakistan Super League (PSL) matches and possibly international

cricket once again. Brief Score: Zalmi X1 145 all out 14.1 overs Babar Azam 41 Yasir Hameed 35 Shahid Afridi 3/12 A Rehman 18/3 Legends X1 Inzamam ul Haq 47 Azhar Mahmood 34

Man City rocked by Brighton as West Ham ease pressure on Potter

LONDON (AFP): Manchester City blew the lead in a shock 2-1 defeat at Brighton that extended their troubled start to the Premier League season, while Liverpool braced for their blockbuster clash with title rivals Arsenal on Sunday.

City striker Erling Haaland marked his 100th Premier League appearance with his 88th goal in the competition since joining from Borussia Dortmund in 2022. But the 25-year-old's third goal this season wasn't enough to help Pep Guardiola's side bounce back from last weekend's 2-

0 home defeat against Tottenham. James Milner's second half penalty hauled Brighton level before Brajan Gruda's late strike completed City's collapse. Spain midfielder Rodri

made his first league start for City since suffering a serious knee injury against Arsenal in September 2024. But Ballon d'Or holder Rodri, who had also started

a Club World Cup match in the summer, was unable to inspire City to their second win of the season. Haaland should have given City an early lead after racing clean through, but he scuffed a tame shot straight at Bart Verbruggen. He also lashed just wide from 18 yards after a flowing City move.

The Norway striker missed another chance with a weak header from Rayan Ait-Nouri's cross, allowing Verbruggen the chance to claw it to safety. Haaland persevered and finally pierced the Brighton defence in the 34th minute,

stabbing past Verbruggen Brighton boss Potter, who from close-range after Omar Marmoush prodded the ball into his path. Haaland

Verbruggen into a miscued clearance just before half-time, but Rodri blazed the chance over. Matheus Nunes handed Brighton a lifeline in the 67th minute. Lewis Dunk shrugged

Bernardo attempt to mark him and blasted a shot that Nunes blocked with his arm away from his body. Milner sent James Trafford the wrong way with a clinical penalty before copying Diogo Jota's goal celebration in tribute to his former Liverpool team-mate who died in a car crash in July. It was the 39-year-old's

first Premier League goal since 2019, making him the second oldest scorer in the competition's behind Teddy Sheringham, who was 40 when he set the record. City were in disarray and German youngster Gruda made them pay in the 89th minute, breaking into the area before delivering a composed finish to spark wild celebrations as Guardiola looked on in disbelief.

Hammers batter Forest In Sunday's other early game, West Ham eased the pressure on boss Graham Potter with a 3-0 win

against Nottingham Forest. Potter had faced calls for his sacking after West Ham conceded eight goals in two top-flight successive defeats, then crashed out of the League Cup at Wolves. chance to shine und Former Chelsea and spotlight on Sunday.

has only been in charge of West Ham since January, may have earned a stay of execution thanks to their late goal spree at the City Ground. England forward Jarrod Bowen curled home from 18 yards in the 84th minute. Lucas Paqueta converted an 88th minute penalty after Crysencio Summerville was fouled by Ibrahim Sangare.

Callum Wilson sealed the Hammers' first win this season with a 90th minute header. Forest's first defeat this season came after boss Nuno Espirito Santo criticised the club's transfer policy and admitted his relationship with owner Evangelos Marinakis has suffered. Nuno led Forest into Europe for the first time in 30 years after an impressive seventh place finish last season.

Liverpool and Arsenal boast 100 percent records after winning their opening two games of the season, setting the stage for a fascinating duel at Anfield. Arsenal finished as runnersbehind champions Liverpool last term and both clubs have been engaged in an expensive arms race since the end of the season. A host of high-profile signings aimed at tilting the balance of power in the title race have arrived at Anfield

and the Emirates Stadium. The likes of Liverpool's Florian Wirtz and Hugo Ekitike and Arsenal's Martin Zubimendi and Viktor Gyokeres have their chance to shine under the

nities put a human face on this ens food insecurity, with ripple crisis. A mother from Kasur, displaced twice within a year, asked, "How many times do we need to evacuate now?" In southern Punjab, a resident looking at the ruins of her home lamented, "The water left nothing." These personal tragedies echo the

ongoing national calamity. Towards resilience: Early

lance offer hope. In Gilgit-Baltistan, a timely warning from shepherds reportedly saved over 300 lives during recent floods, highlighting the critical role of local knowledge and swift com-Stories from affected commu- munication. Experts stress that resilience depends on impactbased, multi-hazard early warning systems that combine technology

with community engagement.

Dr. Zainab Naeem, an environmental scientist, recommends a shift from hazard-based to impact-based risk management, pledges into action and repaemphasizing risk knowledge, early warnings, community preparedness, and anticipatory warning and community action financing. She advocates for polibear the greatest burden yet Amidst the devastation, local cies such as no-build zones on contribute least to the crisis.

flood plains, urban drainage upgrades with green infrastructure, nature-based watershed management, and climateindexed insurance schemes. Equally vital is community involvement in maintaining risk registers, conducting evacuation drills, and operating localized rain and river monitoring systems. A call for global accountability

and urgent action

Pakistan's recurring flood catastrophes, from the devastating 2022 deluge causing \$30 billion in damages and millions displaced, to the worsening crisis in 2025, are stark reminders of the consequences of global inaction. Despite international pledges exceeding \$10 billion at the 2023 Geneva conference, only a fraction has materialized, leaving millions trapped in a cycle of vulnerability. Experts emphasize that true resilience requires shifting from reactive, hazard-based approaches to proactive, impact-driven strategies, backed by timely funding, community-led early warning systems, and sustainable climate adaptation.

The lives lost and livelihoods destroyed are not just Pakistan's tragedy; they are a consequence of broken promises by the world's biggest emitters. The global community must urgently fulfill its obligations, transforming rations, to prevent further human suffering and uphold climate justice for those who

Regufees situation discussed

KABUL (BNA): Mawlavi Abdul Rahman Rashid, Deputy Minister of Refugees and Repatriation, met with Alauddin Devlet Olgar, Chairman of the Turkish-Afghan Business Association, along with several Turkish businessmen, to discuss the situation of Afghan refugees in Turkey. Rashid urged for the voluntary, safe, and dignified return of Afghan refugees to their homeland. He highlighted the importance of addressing the legal challenges many refugees face while residing in Turkey.

Asia is comparable to a living body composed of soil and water. The heart that beats inside the body is Afghanistan. The destruction of Afghanistan would be the destruction of Asia. And in its progress and prosperity lies the well-being of Asia. - Allama Iqbal

greenhouses have been

equipped with the drip irri-

gation systems in northern

rainfall, and floods in others. What is drip irrigation system?

Agricultural experts explain in this system, water s delivered directly to the roots of plants and trees through pipes and drippers, and with a small amount of water, large areas of land can be irrigated and better

yields can be obtained.

Amanullah, a 37-yearclaimed with a smile: "Our land used to remain thirsty due to lack of irrigation water, and yields were low, but since we activated the drip system, this year's vields have almost doubled".

Amanullah, who has been active in agriculture for more than 28 years, equipped 20 acres of his land with a drip irrigation system this year and is very pleased with the results.

'The drip system has made it very easy for us. We were able to irrigate our lands and make them greener by using less water. Earlier, we faced severe water shortages, and crops would dry up or destroyed This year, we cultivated wheat, sesame, watermelon and cantaloupe on these lands, we even sold some the products Shiberghan market, which

brought us good profits". He advised other farmers to use modern irrigation systems to prevent water waste, and asked the government and aid agencies to ern agricultural methods is

Jawzjan province so far this farmer from Ate Khawaja village, has a similar experience. He said: "At first, we thought this system was expensive and complicated, but now we see that water consumption has decreased and our work has become easier. We are hopeful for

the future.' He has equipped his ten acres of land with a drip irrigation system and cultivated wheat, watermelon, cantaloupe, eggplant, and okra, he added.

He expressed satisfaction with the increase of yields and increased sales of his products in the mar-Jawzjan farmers say ket, and urged the government to provide farmers with improved seeds and old farmer from Baba Ali chemical fertilizers in a village of Shiberghan city, timely manner so that they could witness greater progress and quality in agriculture in the coming years.

> "I am very satisfied with this year's harvest. This system has not only saved water consumption, but the quality of the products has improved": also Murad, another farmer who irrigates his 15 acres of land through a drip system, said.

Like other farmers, he is demanding that the government and relevant institutions provide them with modern agricultural equipment and machinery so that they can produce more and better quality products in less time. "If modern facilities and

equipment are made available to us, agriculture in the country will flourish and people's lives would improve". **Expert: Modern irriga-**

tion boosts yields, cuts water use Mohammad Rasool Sar-

dash, an agricultural expert, explained that implementing drip irrigation and modan effective way to increase

yields and reduce water consumption.

"If farmers use these systems, they could pro-Abdul Ghaffar, another duce more and better quality crops with less water consumption": he added.

According to him, these methods also provide the basis for the production of fresh and diverse products, even in conditions of drought and water shortage, and bring the country closer to self-sufficiency in the agricultural sector.

He suggested that Agriculture and Livestock Department should expand its programs in coordination with donor institutions in the field of promoting this sys-

tem and educating farmers. 500 greenhouses equipped with drip irrigation in Jawzjan: Official

Rustam Karimi, head of gricultural Department told Pajhwok Afghan News that due to the continuous droughts and the reduction of water resources in the province, farmers in the province have suffered the most in recent years.

In coordination with partner institutions, they began implementing and promoting the drip irrigation system at the village, district and provincial levels, he added.

Karimi claimed this year, 500 greenhouses were equipped with drip irrigation systems. This measure reduced water consumption, prevented waste, and at the same time increased the production and quality of agricultural products.

He noted he had undertaken extensive programs to raise awareness and educate farmers so they could become more familiar with addressing water scarcity problems and managing water resources. This is despite the fact that in Afghanistan most agricultural land is still irrigated using traditional methods, and only a small number of people use drip irrigation systems.

Steps taken amid flood threat: Sharjeel

F.P. Report

KARACHI: Sindh Senior Minister for Information, Transport and Mass Transit Sharjeel Inam Memon said that the Sindh government has taken emergency measures in view of the threat of a possible superflood. He stated that the Chief Minister of Sindh has personally inspected sensitive locations, including Guddu and Sukkur Barrages, where a flow of up to nine lakh cusecs of water is expected in the event of a superflood. He emphasized that the government's top priority is the safety of human lives, live-

stock, and barrages. In a statement, Senior Minister Sharjeel Inam Memon said that the district administration, Pakistan Navy, and Pakistan Army are actively engaged in evacuation and relief operations, while 192 boats have been deployed in the Kachha areas to ensure timely evacuation.

He said that a survey of all Kachha areas has been completed, and maps detailing the population, houses, and livestock have been provided to the district administration. Arrangements have been made to shift thousands of families to safe government locations, schools, buildings, and tent villages. Food, clean water, and healthcare facilities are being provided at relief

camps.

He added that the Sindh Chief Minister has directed authorities at all sensitive dams to speed up floodfighting efforts and respond immediately to any emergency. Machinery, stones and staff have been deployed at KK embankments, Shaheen embankment, Qadirpur, Rawanti, and other vulnerable sites, with officers maintaining round-the-clock surveil lance.

Senior Minister Sharjeel Inam Memon said that this is not only a test of the government or the administration but a challenge for all of us. He said that President Asif Ali Zardari and Chairman Bilawal Bhutto Zardari are personally monitoring the situation, while party workers have been instructed to assist the

Biggest attempt yet to break Israeli blockade of Gaza

Flotilla leaves Barcelona

attempt to date to break the

BARCELONA (AP): A flotilla of ships departed from Barcelona to the Gaza Strip Sunday with humanitarian aid and activists on board in the largest attempt yet to break the long Israeli blockade of the Palestinian territory by sea.

This comes as Israel has stepped up its offensive on Gaza City, limiting the deliveries of food and basic supplies in the north of the Palestinian territory. Food experts warned earlier this month that the city was in famine and that half a million people across the strip were facing catastrophic levels of hunger.

The Global Sumud Flotilla is carrying food, water and medicine. Activists on board demanded safe passage to deliver the much-needed aid and the opening of a humanitarian sea corridor, according to a statement. The almost 23-month war has killed more than 63,000 people, least with at Palestinians dying of malnutrition, including 124 children, according to the Gaza Health Ministry.

Israeli blockade of the Gaza Strip by sea, which has now lasted 18 years. They will be joined by more ships from ports in Italy and Tunisia in the coming days, on the route from the westof end Mediterranean to the Gaza Strip, organizers said. Thousands of supporters

flocked to the Barcelona pier, some of them wearing kaffiyehs and chanting "Free Palestine!" "Boycott Israel!" to send off a wide variety of boats, flying Palestinian flags, from rundown old luxury yachts to tiny wooden sailboats and industrial-looking vessels. One of them, the Sirus, is more than 100 years old.

Around 70 boats are expected to take part in the final leg of the journey, flotilla spokesperson Saif Abukeshek told Spanish public television after the

departure. The fleet could reach Gaza around Sept. 14 or 15,

he added.

tions from 44 countries is how people are being delibclaimed to be the largest erately deprived of the very basic means to survive. said Swedish activist Greta Thunberg at a news conference.
